• ROCK ROUNDUP •

THIS WEEK WE'VE MADE two changes to our rock radio panels. **KOME** in San Jose, Calif., is added to the Modern Rock panel, reflecting a change in the station's format. This brings the Modern Rock panel up to 38 stations. **KTYD** in Santa Barbara, Calif., a new monitored market, is added to the Album Rock panel, bringing that panel to 108 stations.

WE WANT TO REMIND all of our readers about the Billboard/Airplay Monitor Radio Seminar, at the New York Hilton and Towers on September 9 and 10. Seminar events will kick off the morning of Sept. 9 following the previous night's MTV Video Awards at Radio City Music Hall. Registration will be available at the convention beginning on Sept. 8, but pre-registration is available now. (See the advertisement on page 7 for details.)

The radio business seminar, geared toward PDs, MDs, and label promotion executives, will include interactive sessions and training workshops hosted by Billboard sister company Broadcast Data Systems on Sept. 9 and 10, giving seminar registrants two opportunities to attend.

In addition, the seminar will feature sessions and keynote speeches focusing on the recent changes in all facets of the radio business. Seven format-specific gatherings are also planned in the following genres: adult contemporary, album rock, modern rock, country, Spanish, R&B, and top 40. The Billboard/Monitor Radio Awards will be held Sept. 10 as the seminar's closing event.

The New York Hilton and Towers is charging seminar attendees a rate of \$160 a night for single and double occupancy rooms. Reservations should be made by August 19, and can be obtained by calling the hotel at 212-586-7000 and mentioning you're registering for the Billboard/Airplay Monitor Radio Seminar. See you in the Apple!

Records showing an increase in detections over the previous week, regardless of chart movement. A record which has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records which attain 800 detections (album) or 400 detections (modern) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the charts after 26 weeks.
