PDs Expect Stable Ownership In '99, But Brokers Think Otherwise

by Jeff Silberman

If you agree with the 85% of the programmers polled in Airplay Monitor's 1998 year-end survey who believe their stations will have the same owner in 2000 as they do now, maybe you should take some Prozac before reading any further.

According to several brokers who find and help consummate radio station acquisitions, their business will be as good, if not better, in 1999. Even if no mega-deals materialize this year, the majority of these brokers foresee plenty of sales in medium and especially small markets. Even the "big three"—CBS, Clear Channel/Jacor, and Chancellor Capstar—are expected to be busy swapping stations to meet FCC/Department of Justice guidelines and expanding in ancillary areas such as

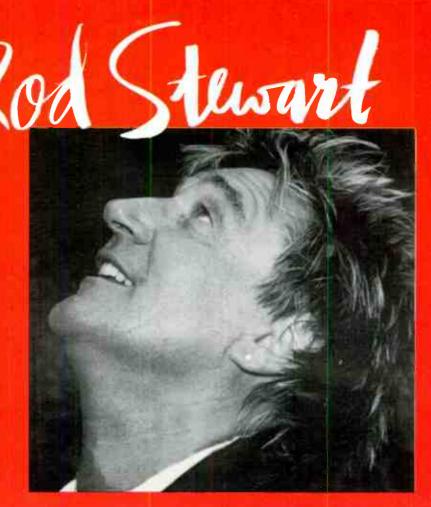

outdoor advertising and international acquisition.

Unless the economy takes a major—and they mean *major*—downturn, the radio acquisition business will continue to be robust, because a bevy of new parties still wants to get into ownership at a time when available quality stations are few and far between.

"The pace [of station acquisitions] in 1999 looks to be on par with '98," says Kelly F. Callan, VP of Kalil & Co. "Radio and TV have been resilient to economic downturns, and that will continue this year, which should make '99 an even better year than '98."

"98."

"This affects not only radio, but related industries down the line," adds Robert K. Whyte, VP of Daniels & Associates. "Every time radio groups Continued on page 6

Pietroluongo, Saxe Join Airplay Monitor

It was a busy holiday break for the Airplay Monitor publications. While others vacationed, Monitor added two to key positions, naming Billboard veteran Silvio Pietroluongo chart administrator and broadcaster/trade journalist

Frank Saxe writer/reporter. Both appointments are effective immediately. They accompany a slew of changes to Top 40 Airplay Monitor's chart pages this week, pri-marily in the AC and adult top 40 sections.

In his newly created position, Pietroluongo will oversee all aspects of Monitor's chart system, working closely with the existing chart managers and directors. Among his tasks will be the development of new chart features and the institution of procedures designed to streamline Monitor's chart efforts.

A 10-year veteran of the Billboard chart department and winner of parent company BPI's President's Award, Pietroluongo joined Bill-board as a report-taker in 1989 and most recently held the position of senior manager/re-tail charts and archive research at that publication. A Fordham University graduate, Pietroluongo also worked in radio at WFAS-FM White Plains, N.Y. He will remain based in New York and will report to publisher Jon Guynn. Saxe joins Monitor from the industry trade

including the FCC, Congress, and the Justice Department. He also wrote a monthly radio advertising column for RBR. Prior to that, Saxe spent seven years in radio, most recently as a news reporter/anchor for N/T WROW Albany, N.Y., and state capital reporter for N/T WCBŚ-

AM New York Saxe will be based in New York, where he'll contribute to all four Monitors with a special emphasis on enhancing Monitor's coverage of business and regulatory news. He replaces Dana Hall, who was promoted to

managing editor of R&B Airplay Monitor in

publication Radio Business Report, where he covered radio from a Washington perspective-

You'll also notice several key changes to this week's Top 40 Airplay Monitor. Among them, e've expanded the AC section to include more playlists and Song Activity Reports in a format where our count of reporting stations has nearly doubled in recent years. We've also expanded the Song Activity Reports for adult top 40 and consolidated the Adult Top 40 and Modern Adult Power Playlists into one section. And we've moved the info on the week's new releases to page 8 in an easy-to-use new feature called On Your Desk.

Prince Parties Again On Four Charts

CHART CHECK: With special programming ending this week, nearly every title on the top 40 mainstream chart earns a bullet, except those titles that have been on that chart for more than 20 weeks. Meanwhile, the rhythmic top 40 chart, which is usually more prone to spin fluctuations due to holiday programming, seems barely affected by year-end special programming, with one exception—Prince's "1999" logged 773 spins from airplay at 29 stations to enter that chart at No. 13. It also enters the mainstream top 40 chart at No. 36, adult top 40 at No. 33, and modern AC at No. 33.

MUSICAL CHAIRS: Felicia Swerling, Epic's national pop promotion director, joins Warner Bros. as VP of pop promotion on the West Coast . . . Arista's video promotion person, Andrew Berkowitz, is upped to senior director of promotion.

FOR THE RECORD: Effective with the Dec. 25 issue, KSEQ Fresno, Calif. (PD Rik McNeil, MD Steve Perez, 209-627-9710), was added to the rhythmic top 40 panel; WSNX Grand Rapids, Mich., moved from the mainstream top 40 panel to rhythmic top 40 and will be a dual reporter to the crossover panel; and KKXX Bakersfield, Calif., and KOHT Tucson, Ariz., were added to the crossover panel and remain as rhythmic top 40 reporters. There are now 108 mainstream top 40, 33 rhythmic top 40, and 61 crossover reporters.

New Year Rings In With R&B Oldies

JEFF SILBERMAN

Lots of R&B oldies converts over the holiday, among them KHYS/KJOJ Houston, now the Jam after a brief stint as mainstream top 40; former adult top 40 WNPL (the Planet) Nashville and classic rock rival WGFX; and short-lived hot AC WXLE (Magic 104) Albany, N.Y., now the Beat.

KHYS/K[O] are now being overseen by Carl Conner, PD of adult R&B sister KMJQ (Majic 102), and Majic GM Ernest Jackson. PD Greg Head's role with owner Clear Channel was unknown at press time.

AC-to-R&B oldies convert WBIX (Big 105) New York has its new handle, Jammin' 105, to go with its "jammin' oldies" positioner. Also heard on WBIX over the holidays was top 40 vet Famous Amos in late nights. And new R&B oldies WUBT (the Beat) Chicago taps top 40

MONITOR PROFILE

John Peake Elevates Heritage Top 40 KRBE Houston To New Heights

It was only the first phase of the fall Arbitrend, but KRBE Houston and PD John Peake trend, but KRBE Houston and PD John Peake had something to crow about. For the first time in its 15-year history as a top 40, KRBE claimed the 12-plus market crown. "It's certainly more critical to do well in your target demos, which we did anyway," Peake says. "When you overperform in your target demos, you can generate a spilloyer in other demos, that can lead to a ate a spillover in other demos that can lead to a No. I showing 12-plus, which can give you pretty good bragging rights in the market."
Peake came to KRBE three years ago, when

PD Tom Poleman left for WHTZ (Z100) New York with several members of the programming team. Not only has Peake reclaimed KRBE's top 40 heritage after several years on the cusp of modern rock, he has expanded on it, despite Clear Channel's short-lived attempt to flip rival KHYS (Kiss 98.5) from rhythmic to mainstream top 40 in hopes of protecting the 18-34 ranking of R&B sister KBXX. "We were very watchful of what they were doing and how they were designing their strategy," Peake says.
"It was clear that they were using Kiss to take a

John Peake Program Director KRBE Houston

'I don't want our chart over-represented by modern pop artists, nor do I want too much 'N Sync and Backstreet Boys.'

little bit away from us, but it didn't happen. Although we haven't had our head in the sand, it's been business as usual for us.

Peake's strategy obviously paid off, as KHYS just flipped to R&B oldies "98.5 the Jam." It wasn't the first time KRBE had faced competition. It was one of at least five top 40 stations in the early '80s and part of a three-way race with KKBQ (93Q) and KNRJ (Energy 96.5), now KHMX, nearly a decade ago. More recently, modern adult KKPN (the Planet) surfaced in 1997, only to be sold and flipped to Spanish. "It has gotten more competitive, as Kiss was designed purposefully to damage us, while we still have [adult top 40 KHMX] the Mix and [modern KTBZ] the Buzz flanking us. [Both are owned by Jacor.] Yet being a stand-alone has given us a competitive advantage here. All of our focus and energy is on this station. I don't have to worry about sharing marketing dollars with others or which station gets the van next weekend. We're more dexterous; we can move quickly on events without getting approval from corporate management.

The biggest change at KRBE during Peake's tenure has been the gradual evolution in Houston's musical taste—and KRBE's reflection of it. "When I first got here, there was a pretty strong appeal for the dance/pop of La Bouche, Amber, and Jocelyn Enriquez," he notes. "That music has dissipated to the point where there isn't current dance/pop available. It has since been replaced by modern-leaning pop artists such as Alanis Morissette, Jewel, Sheryl Crow, and the Goo Goo Dolls. Fortunately, that music is balanced by Will Smith and Next, which gives us a lot of variety to work with.'

The key word in KRBE's music mix is balance. "We try not to go too far in any one direction," Peake says. "I don't want our chart over-represented by the modern pop artists, nor do I want too much of the 'N Sync and Backstreet Boys. And when we're low on a certain type of sound, we lean on our recurrents

and golds to pick up the slack."

Here's a typical hour on KRBE: Sarah
McLachlan, "Angel"; Aaliyah, "Are You That
Somebody?"; matchbox 20, "Back 2 Good"; Fiona Apple, "Criminal"; Edwin McCain, "I'll Be"; Monifah, "Touch It"; Shawn Mullins, "Lullaby"; Madonna, "Frozen"; New Radicals, "You Get What You Give"; Shania Twain, 'You're Still The One"; Dave Matthews Band, "Crash"; and Sweetbox, "Everything's Gonna

"It's important to follow your listeners' tastes, then use your experience and intuition to make good, song-by-song decisions," Peake says. "There are always certain records that test well but we won't play and those that don't test well but we will play because we believe in their hit potential. For instance, all of Madonna's records—'Frozen,' 'Ray Of Light,' and 'Power Of Goodbye'—were extremely successful records for us, but if we followed call-out research, we would've dropped them before they had a chance to break. We realized Madonna's importance to the format and that the records had a sustainable appeal, so we sat through some pretty dark days on [those] records.'

The lack of patience, according to Peake, is "really hurting the format right now. We have to put on records we truly believe in and have the patience to play them at least 150-200 times to get a real read on them. Granted, we work in an environment where artists such as 'N Sync put out records that react much quicker. That inevitably makes us put the 'hairy eyeball' on Madonna's records.

"Having that patience is made even more difficult by the record community, who are clamoring for any open spots on our list, especially when they see us on a record that's going down nationally," he continues. "We have to stand by the records we believe in, and, fortunately, most of them come through for us in a

big way."
Although KRBE is the epitome of a heritage station in Houston, Peake still regularly refreshes its imaging. "Every eight to 10 months, we purposely redo most of the production elements to create a new sound for the station," he says. "On the marketing side, we use a pretty consistent combination of outdoor and TV. We update the creative of TV [spots] once a year and the billboards twice a year.

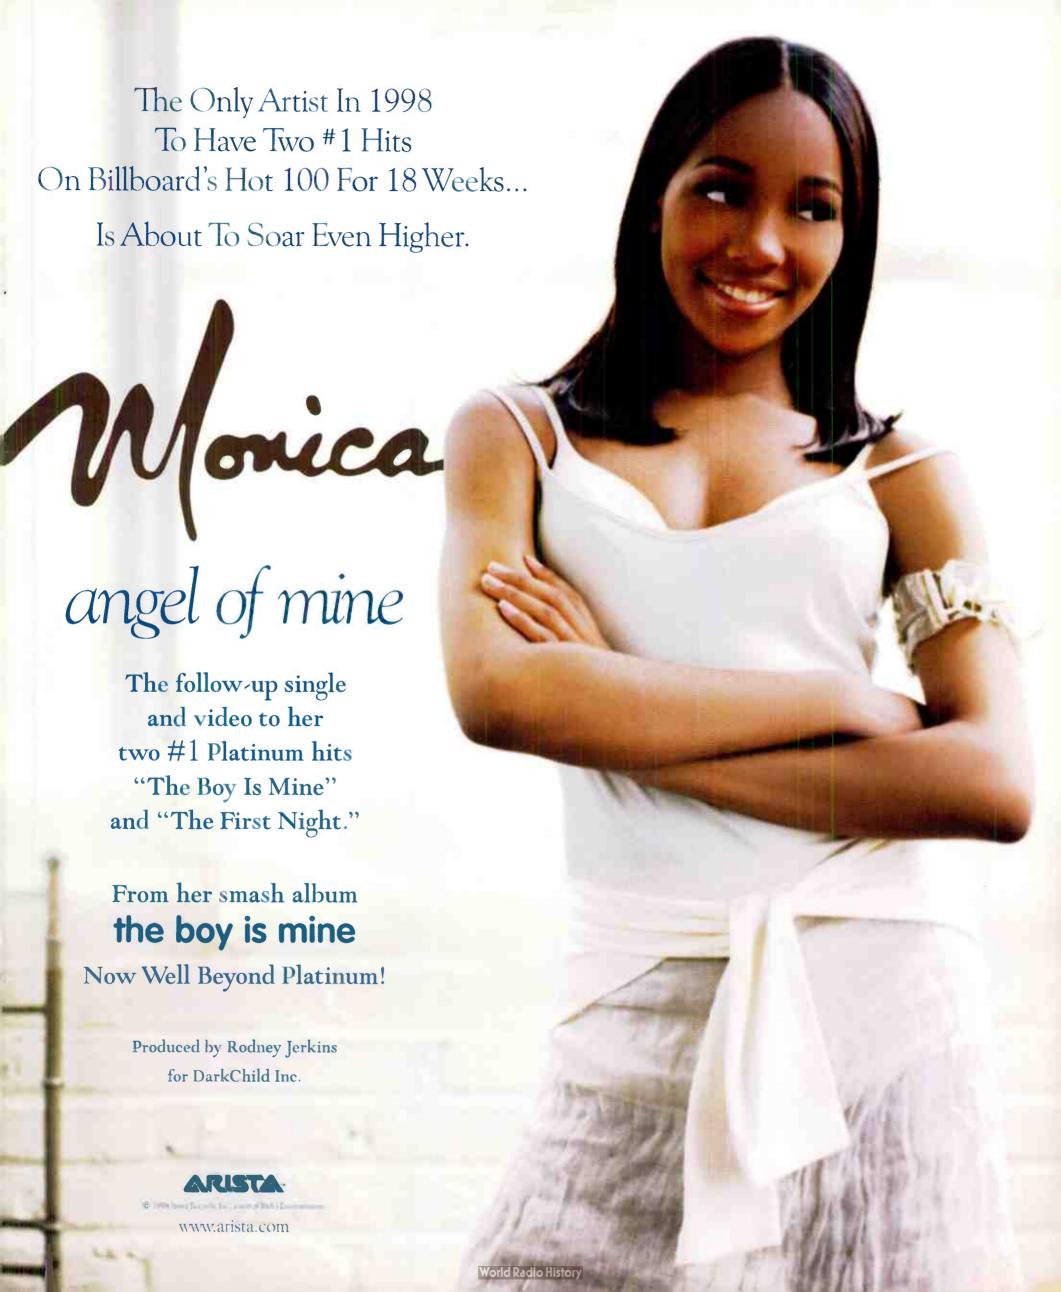

One way KRBE stays on the cutting edge is with its World Wide Web site, which "has become important to the promotion and marketing of the station," Peake notes. "It allows us another visual way to showcase the station. We're getting up to 30,000 hits a week, which enables us to reinforce our promotions as well as run some that don't quite fit on the air. In the past, we've gotten promotion requests from clients that were too complex to run on the air, such as scavenger hunts and trivia contests."

But is it a full-fledged source for nontradi-

tional revenue? "At this point, it's basically another promotional tool," he replies. "If there's a station that's making good money off the Internet, I'd love to talk to its programmer.'

Peake doesn't have to worry about generating money off the Web site, because the station's doing so well on the air. Besides the aforementioned reasons, he also cites another important key to KRBE's stellar showing. "Our GM, Nancy Vaeth, has a great understanding for top 40 radio," he says. "She's been here through all of KRBE's ups and downs; she knows our bread-and-butter comes in the 18-34 demo. She realizes that if we get tempted and try to spread our target out and chase the 25-54s as well, we put ourselves in a precarious position. That, on top of being blessed with a great MD, Jay Michaels, and an amazing staff has made us a pretty solid station and has brought us this success

If anything is slowing in corporate radio, it's the incidence of major group buyouts. "The majority of big-time consolidation has occurred," contends Gary Stevens of Gary Stevens & Co.

There will be a few trades here and there, where the majors fill in some markets [up to FCC/DOJ-mandated levels]," adds Larry Patrick, president of Patrick Communications. 'There's just not as many stations out there to

But the trio of titans won't be sitting on their hands either. "The big three would still like to get bigger," Callan notes. "They'll find a way to do that, even if it means going into medium and smaller markets. Consolidation there will go at a pretty fast clip."

"There will be plenty of opportunities for the big to get bigger," adds Michael Bergner of Bergner & Co. "They'll acquire spinoffs from majors that divest themselves of stations in markets to meet ownership caps. Now they'll buy into smaller markets, getting tremendous multiples on the stock in exchange for the cash flow."

"There seems to be a propensity among the remaining behemoths to trade directly with each other," Stevens notes. "That, in effect, makes the broker a rep for the buyer, instead of a facilitator for both parties.'

STUCK IN THE MIDDLE

Beneath the big three are such major groups as Emmis, Greater Media, Saga, Susquehanna, and Jefferson-Pilot. Could one or more of them merge and become the fourth major in '99? "I don't see it," Patrick says. "If you just look at the numbers of stations and revenue, it might make sense on paper. But there are major philosophical differences in how they run their companies. There's the question of who runs the merged entity. These 'mergers' are never a merger of equals; someone has to win and someone has to lose. Why would a Jeff Smulyan want to play second fiddle?"

All the brokers note that the midlevel players are exceptionally well-run. "These companies can prosper indefinitely, because they have great management, good balance sheets, and put great products on the air," Whyte says.
"Emmis is totally plugged into New York and Los Angeles. They're making great money; there's no reason to lose their independence.

'There's always a belief that at some point, some of the remaining independents will con-clude that it'd be better to sell out," Stevens says. "The big question will be, Just what constitutes a critical mass? Jerry Lee's WBEB Philadelphia does very well. Emmis doesn't have a lot of stations, but what they have are doing well in the right places.'

"If a company can build a cluster in just one market, it doesn't matter if it's anywhere else,' Bergner adds. "It's the king of that market, and it'll easily prosper.'

SMALL-MARKET CLUSTERS AND STAND-ALONES

Expect most of the action in 1999 to be in the smaller markets. "You're going to see more Cumulus-type companies emerging," Whyte says. "They'll be developing on a regional basis. I'm talking to guys in the Northeast who want to do what Bud Paxson did in Florida, amassing a lot of little stations to build a platform, then going from there.'

'Because the major and most medium markets are pretty sewn up, midlevel groups such as Citadel, Saga, and Connoisseur are looking to build new clusters in small markets," Patrick adds. "That's why Saga went into Bellingham, Wash. By the end of '99, there will be fewer mom-and-pop owners in the small markets, and many stand-alones will be

picked off as well. They'll be cashing out with

good numbers."

One debatable subject is the future of standalone stations, such as Emmis' WKQX (Q101) Chicago and KPWR (Power 106) Los Angeles or Susquehanna's KRBE Houston. "Even in this consolidated world, stand-alones in major markets can prosper," Callan says. "If they're run by good operators and carve out a niche in that market, they can still do quite

Patrick is less bullish. "Stand-alones can survive, but it'd be better if they had partners,' he says. "Susquehanna is constantly looking for partners for KRBE; in fact, they're close to setting one up" in Anniston, Ala., [with current stand-alone] WNNX Atlanta.

'In the short term, a stand-alone can do well, but the long term isn't as promising," he says. There's less room for error at a stand-alone. A station that's part of a cluster can lose a major air talent or programmer and not be devastated. But if important personnel left a standalone, it could have a detrimental impact."

BUYING OUT OF THE STATION

Most of the brokers are also involved in the majors' interest in ancillary businesses. "Outdoor has been a hot topic for the past three years," Callan notes. "In their pursuit for critical mass, they're also looking into magazines, air traffic systems, and the Internet. The major groups will continue to branch out globally. They have built some very well-oiled machines. It doesn't matter if a station's in Indianapolis or Moscow.'

Stevens has some misgivings about such international expansion. "It's a completely different business," he says. "I spent a lot of time with broadcasters in the U.K., and they're not on the same wavelength as us.'

'Foreign business is our Wild West frontier," Whyte says. "Some firms are putting on their six-guns and buying anything that radiates. Governments want our expertise while protecting their own culture. Granted, Amercans didn't have success in England for a variety of reasons, but they're doing well on the Continent and in Australia.'

EVERYONE WANTS TO PLAY

Adding fuel to the acquisition fire is the demand from outside parties to get in on the ac-tion. Infinity's recent IPO saw its stock sell like Furbys. "About 140 million shares went at \$20.5 $\acute{0}$ a crack, and you couldn't find the stock anywhere," Whyte says. "Everybody wanted in on the deal. Why? Where else could you find a business with 55% gross profit margins? The only business with better margins is outdoor,

which the big players are already into."
In fact, 1999 is shaping up to be the perfect time for new owners. "Right now, the major players are on the sideline," Bergner notes. "Chancellor has to absorb Capstar, ditto Clear Channel and Jacor, and Cumulus bought a lot last year. They'll spend most of '99 digesting what they bought. This creates a window for new players to get deals. I've been working with entrepreneurs who don't mind picking up turnarounds, move-ins, and upgrades. They can even get their foot in the door with AMs, then broker the time.'

'In addition, we'll see a lot of fallout from people who made wild-and-woolly purchases over the last three years, trying to stay ahead of the acquisition spree," Whyte says. "Now they realize that they have to manage these puppies and create something everyone forgot about—shareholder value. When that fruit falls from the trees, some pretty good op-portunities will fall into the hands of local operators, from GMs looking to own to car dealers wanting to get into radio.'

That's why most brokers believe that '99 will be an even busier year than '98 and that no mere recession can stop this momentum. "Everyone's bullish," Bergner says. "True, forces out of radio's control can drive stock prices down, but radio itself is healthy.

"If you asked [about stock-market impact] last September, when the market was down Continued on page 7

High Spot Loads Are Worse For Top 40

Nearly a decade ago, I had a conversa-tion with a newly prominent PD about his conversion from MD to programmer. One of his first revelations, the programmer said, was that owning the "more continuous music" franchise really was important to a station's success. To a radio junkie, it was hard to hear that quantity of music could be more important than quality of music. Besides, "10 in a row," "22 in a row," etc. didn't make for very exciting radio. But even though I didn't want it to be true, I figured the programmer was probably

In a few days, the first fall Arbitron numbers will be here, and based on what we've seen in the trends thus far, it's not looking good for top 40. There's a lot going on here, of course: fall isn't usually a great top 40 book, even when there's terrific uptempo product, which was in noticeably short supply this time. But seeing top 40 stations lose 12-plus shares that don't always show up on any logical competitor, one suspects that there's a TSL issue here that's being exacerbated by the increased spot load that most broadcasters are now living with.

In recent years, most top 40 stations have changed their positioners from quantitative to qualitative ones, especially now that "today's best music" is something to brag about, rather than the cruel joke it was when that slogan first came into common usage in the early '90s. And many top 40 PDs, while concerned about today's heavier spot loads, have figured that they will impact all stations equally.

Recently, however, I've come to believe that top 40 PDs, even more than their counterparts in other formats, need to do whatever they can to hold the line on spot load and to communicate that they're do-

ing so to listeners. And here's why.

1. Top 40 is still a format of P2 listeners. One can't assume that top 40 stations will get the same benefit of the doubt during a long stop-set that listeners give their PI

2. Top 40 is, by its very nature, a cumedriven format that has always had TSL challenges. It's not a format with quarterhours to burn.

3. This is already a format that, by necessity, courts certain negative images with lis-teners—"the station that plays the same songs over and over," "the station whose DJs talk too much," etc. When top 40 PDs get too hung up on those images, they usually end up trying to make top 40 something other than what it's supposed to be. But having the "too many commercials" image on top of the others is dangerous. And it's the one that can be controlled.

Sort of. Saying that top 40 shouldn't run too many spots in these pages is, doubtless, preaching to many already converted PDs whose response will be, "Don't tell me, tell my GM [or GSM/group head/investors/etc.]." That doesn't mean that top 40 PDs can abdicate the "more music" battle, either on- or off-air. PDs who can find any sort of quantitative music position to self-short of the not-so-meaningful "another long set of continuous music"should try to counteract the damage that's been done to that image, especially after

those even heavier holiday spot loads.

We know from the early '90s that "to-day's best music" by itself wasn't enough for top 40 to image itself around, although that slogan is presumably more effective now that "today's best music" no longer means "Faithful" by **Go West.** We also know that quantitative music imaging has never been enough when the rest of the product wasn't there. Top 40 is a format that needs to control both images (and be able to back up on-air claims it makes in that regard). And in the event that your GM/GSM/group head/investors will listen, it's not a format that's entirely back on its feet just yet. It still needs special care and feeding, and the spot-load issue is one place where that's particularly true.

PDs Expect Stable Ownership, But Brokers Think Otherwise Continued from page 6

15%, I might have a different answer, but following the election, the market rebounded and the industry is doing fine," Patrick says. "If the impeachment and Iraq bombings create a 20% drop in the market, then I'll worry. But right now, the market is strong.

What recession?" Whyte asks. "Granted, radio can't control the international impact on the market and our economy, but radio financing is a lot different today. During radio's last downturn in '91 and '92, acquisitions were financed on debt. Now they're financed with equity.

"Does this mean the big three will get much

bigger? Not until they demonstrate the ability to deliver shareholder value, in the form of station profits," he continues. "Jacor and Capstar will sell some stations to figure out what they are, then they'll do very well.'

'[The majors] are writing the book on [managing hundreds of stations] as they go along," Stevens adds. "There's no manual on that. But unless we go into a deep recession, they'll find a way to make it work."

And if that happens, Whyte declares, "the question for the year 2000 will be, Who will

buy the mammoth broadcasters?

38 40 WE CAN FREAK IT ANTRAVASM KURUPT Records showing an increase in detections over the previous week, regardless of chart movement. A record that has been on the chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records that attain 900 detections for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the chart after 26 weeks. @ 1999. Billboard/BPI Communications **★ BIG PUNISHER** ★ DJ CLUE (FEAT. DMX) 174/31

HUMAN BEINGS WARNER BROS.

Records showing an increase in detections over the previous week, regardless of chart movement. A record that has been on the chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records that attain 900 detections for the first time. If two records are tied in

number of plays, the record being played on more stations is placed first. Records below the top 20 are removed

Based on a national sample of data collected by Broadcast Data Systems, 43 stations from Adult Top 40, Mainstream Top 40, Triple-A and Modern Rock are electronically monitored 24 hours a day, 7 days a week. Songs ranked by number of detections in monitored week. All stations continue to report to their primary format. Records showing an increase in detections over the previous week, regardless of chart movement. A record that has been on the chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records that attain 800 detections for the first limit if two records are tied in number of plays, the record being played on more stations is placed first. ©1999, Billboard/BPI Communications

Records showing an increase in detections over the previous week, regardless of chart movement. A record that has been on the chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records that attain 400 detections for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the chart after 26 weeks. © 1999, Billboard/BPI Communications.

Records showing an increase in audience over the previous week, regardless of chart movement. Rankings by format (on right side of this page) correspond to 40-position charts printed in this week's Monitor (30 positions for adult contemporary); therefore rankings do not exist for recurrents and records below No. 40 (No. 30 for adult contemporary). Audience computed by cross-referencing exact times of airplay with Arbitron listener data. ©1999, Billboard/BPI Communications.

Capecords showing an increase in detections over the previous week, regardless of chart movement. A record that has been on either chart for more than 20 weeks will not receive a bullet, even if it registers an increase in detections. Airpower awarded to those records that attain and the conditions (mainstream) or 600 detections (rhythm) for the first time. If two records are tied in number of plays, the record being played on more stations is placed first. Records below the top 20 are removed from the chart after 26 weeks.

I STILL BELIEVE THE FIRST SOLO SINGLE FROM HER ALBUM #1'S OVER 10 MILLION SOLD WORLDWIDE
