Library of Congress Catalog Card No.: 67-118025

The Model 1801 sweeps from 1 to 500 MHz. For CATV people, that just about covers everything.

It certainly covers the bands now being used. And because the 1801 has an optional high-band range of 450 to 950 MHz, it takes care of any likely to be used in the future.

We designed the 1801 specifically for testing CATV components and systems. For instance, you can sweep an entire operating system in 2 milliseconds—so viewers will never be affected. Here are some other advantages of having an 1801:

- Ultra-flat, 75-ohm output system ensures minimum mismatch allowing precision VSWR and flatness measurements.
- High output of +57 dBmV for passive component evaluation.
- 90-dB calibrated attenuator for precise gain (loss) readings.
- Precision electronic reference attenuator (± 0.05 dB to ± 0.5 dB) for fast, accurate indication of VSWR and tilt.
- Solid-state electronic tuning, sweep and attenuation for added reliability.
- RF-modulated markers require no extra cable, thus reducing hum and noise pickup.

Whether you're a manufacturer, installer or operator of CATV systems, you ought to have a Model 1801 Sweep/Signal Generator. It'll cover just about any test situation you can name.

REVIEW THE NEW EARLZ

TELEVISION PROGRAM

MORNING? NOON?
NIGHT? NEWS?

"We're airing your program in 'The Today Show' at 7:25 A.M., and have received nothing but complimentary phone calls and letters. The show obviously has appealed to all of the normal demographics — men, women, 18 to 39, as well as the 40-plus type. Sponsor reaction is great... and without question this is one of the most successful syndicated programs I have ever been associated with."

— Boyd W. Lawlor, Vice Pres.
KSBW-TV, Salinas-KSBY-TV,
San Luis Obispo, Calif.

"Viewer reaction to Mr. Nightingale's program has been excellent. The basic concept of 'Our Changing World' is unique and generally appealing to our audience."

— Richard C. Dreyfuss, Prog. Mgr.,
WTAF-TV, Philadelphia, Pa.

"Response has been 100% favorable... we're pleased with the quality of the program and very high on its successful performance as an integral segment of our week-night 11 o'clock news."

— Arthur M. Dorfner, Pres., WDHO-TV, Toledo, Ohio

"The program has been very well accepted — the bright spot in our afternoon TV programming at 5:55, preceding local news."

— Jess Mooney, TV Acct. Exec., Savannah, Ga.

You have to be tops to go to the Olympics*

Vidifont is the electronic character generator system that's tops in its field. It's the one system that can do all your titling instantaneously with the help of only one operator. The graphic qualities of news flashes and all messages are superior. Because Vidifont features proportional letter spacing, a choice of type fonts and sizes, upper and lower case characters, word-by-word color, push button centering, three-speed flashing, built-in edging, and roll and crawl. Little wonder that Vidifont was chosen to play a big

part in the world-wide telecast of the Olympics. With Vidifont on your side, your station could break a few records in the race for viewer ratings. To discuss your station's requirements, call (203) 327-2000 or write:

Sometimes the best show for daytime is a show that feels like nighttime.

And no one knows how to do it like Mike Douglas because no one knows daytime, like Mike Douglas.

For the ten years his show has been on TV, Mike has been working on a very simple plan: Deliver nighttime quality entertainment...with celebrity co-hosts like Sammy Davis Jr., Carol Channing, Jennifer O'Neill, and Liberace; celebrity guests like Henry Fonda, Bette Davis, Elliott Gould, Karen Valentine, Ralph Nader, and Don Ho... only deliver it in the *daytime*.

Pace it with plenty of singing and laughing. For a change of scenery, take the whole show on the road every once in a while to Hawaii, the West

Coast, Chicago, Florida. Keep it young and keep it moving.

No wonder Mike Douglas is called (and not just by his ad agency) the King of Daytime TV. Consistently top-rated in his time slot in New York and Los Angeles,* where the competition is the heaviest. As well as many other markets.

Contact Group W Productions. We've got 250 new shows a year, available in 90- and 60-minute versions. Maybe what you need to brighten up your daytime programming is the show that feels like nighttime programming.

The way to a kid's head is through his stomach.

A hungry child is a lot more concerned with getting a good meal than with getting a good grade.

Every morning nine million children go to school thinking about food instead of reading, writing and arithmetic.

We accept the challenge

Following the 1969 White House Conference on Food, Nutrition and Health, our Continental Baking Company responded to the need for a nutritious school breakfast that would taste good and wouldn't cost much.

Working with the Department of Agriculture, our food scientists came up with a high-protein food that looks and tastes like cake. We called it H-11.

The name is Astrofood*

One serving with eight ounces of milk has about as much nutritive value as four ounces of orange juice, two strips of bacon, an egg, and a

piece of buttered toast. And which, including the milk, costs about 15 cents.

Already about 15,000 children today in schools, day care centers and Head Start programs are eating an H-11 breakfast. Except we re-named it and package it as Astrofood. We didn't think a name like H-11 would appeal to children, no matter how good it was for them.

Astrofood isn't available at retail, nor nationwide yet to schools and other such institutions. But we're working to expand distribution and to develop other varieties.

After breakfast comes lunch

Another of our companies, Morton Frozen Foods, cooked up another meal for children. Lunch. Over 20 tasty varieties.

Our Morton lunches can be served hot in their own containers. That makes cleaning up after lunch easy.

Two people can serve 1,000 children. The only equipment the school needs is a fast-heat oven, a freezer, milk cooler, and portable lunchroom furniture.

Hunger causes drop-outs

Hungry school children, unable to concentrate, may eventually become drop-outs.

So if we can fill their stomachs now, they won't have to learn the hard way later just how important a good education was to their future.

Note: ¹ National and regional spot and local spot sales are for time only. Excluded are revenues from programs, talent, materials, facilities and services sold in connection with the sale of time. These amounts totaled \$10,119,073 from national and regional advertisers, and \$26,045,871 from local advertisers. ² Before commissions to agencies, representatives and brokers. Because clarifying instructions were issued in 1969 regarding the classification of time sales into national and local, caution should be used in comparing these figures with figures for years prior to 1969. ³ Does not include 27 satellites that filed combined reports with their parent stations. ⁴ Total time sales less commissions to advertising agencies, representatives and brokers, plus sales of programs, materials, facilities and services, plus other broadcast revenue. ⁵ Before Federal income tax. ⁶ The Oak Hill, W. Va. station is no longer included in the Charleston-Huntington-Ashland market but has been combined with the Bluefield, W. Va. station to form a new 2 station market, Bluefield-Bekley. ⁷ The Mitchell, N.D. station has been added to Sioux Falls to create the Sioux Falls-Mitchell market. ⁸ The Jacksonville, Ill. station is included in the Springfield-Decatur-Champaign-Urbana-Danville market. * One or more stations did not report data for the full year. ** Data withheld to maintain confidentiality of individual station figures. † Parenthesis () denote loss.

Color, Multi-Set and UHF Penetration by U.S. Markets

Based on ARB Nationwide Sampling Sweep

February/March 1972

Following are American Research Bureau estimates of the TV Households with Color Television Sets and UHF-equipped Television Sets, and Multi-Set Households for all markets surveyed during ARB's February 9-March 7, 1972, nationwide sampling. Color and Multi-Set estimates in this report were derived from telephone placement calls to families selected for participation in ARB diary surveys. UHF estimates are based on in-tab diary responses.

Color TV and Multi-Set Households estimates are based on each market's Area of Dominant Influence.¹ The ADI^{1m} (Area of Dominant Influence) is an exclusive geographic area consisting of all counties in which the home-market stations receive a preponderance of total viewing hours. Original ADI definitions were based on ARB's Television Coverage/65, a nationwide (excluding Alaska) all-county study of television viewing in the United States. These areas have been revised annually from later estimates obtained during subsequent ARB nationwide sweeps. A complete listing of the ADI markets and the counties included in them appears in the ARB publication, *1971-72 Exclusive Television Market Areas of Dominant Influence in the United States* (copies available on request). Since each area is geographically exclusive of another, the total of all ADI Color, UHF and Multi-Set Households represents the total estimates for the United States.²

UHF Households estimates are shown for both the ADI and the Metro Rating Area, as defined in ARB Television Market Reports. The Metro Rating Area generally corresponds to Standard

Metropolitan Statistical Areas as defined by the Bureau of the Budget, subject to exceptions dictated by historical industry usage and other marketing considerations such as channel allocations.

Color TV Households, Multi-Set Households and UHF Households estimates are also shown as a percentage of Total TV Households within each of the defined areas. Further information on ARB sampling methodology and area definitions is available in the ARB *Description of Methodology* or from the American Research Bureau.

¹ ARB updates Total Survey Areas and ADI markets at the beginning of each broadcast year. Metro Rating Areas are subject to annual revision. The user should be aware of potential re-definitions when making comparisons with estimates from previous surveys. Please refer to the appropriate ARB Television Market Report or to the ARB *Description of Methodology* for information regarding survey areas, sample sizes, methodology, etc.

² Color TV, UHF, and Multi-Set Households estimates are also shown for a number of markets which, according to ARB surveys, have no Area of Dominant Influence of county size or greater. These estimates are based upon the Home County of the market and, therefore, are not directly comparable to the ADI estimates listed for other markets. Because these are not additive with other market listings arriving at total U.S. estimates, information for these markets is listed separately. The name of each non-ADI market is shown in parentheses following the corresponding ADI market.

^{1m} ADI is a service mark of American Research Bureau.

The following estimates are provided for those Television markets which, according to ARB findings, have no geographic area of dominant influence of county size or greater. They are based upon the home county(ies) of the market and therefore, are not directly comparable to the ADI estimates listed previously. The home county(ies) is shown in parentheses following each non-ADI market. Because the survey areas of the markets listed below are composed of counties which are part of other markets' ADI's, these estimates are not additive.

CBS TELEVISION NETWORK RATES

(Consult Network for Discounts, Specifications, etc.)

The CBS Television Network, as a national advertising medium, solicits those orders which will provide the largest nationwide circulation, the best program quality most suitable for a given time period, and which will leave no substantial portion of the nation without network service. While no minimum line-up of stations is required, the CBS Television Network in determining whether to accept a particular order, will consider the foregoing objectives. In the case of a program involving more than one advertiser, such consideration will include the stations otherwise ordered for and carrying the program.

Corporate structure: The Canadian Broadcasting Corp. is a publicly-owned corporation chartered by Parliament with carrying on a national broadcasting service in Canada. It is directly responsible to Parliament and is financed by an annual Parliamentary appropriation, supplemented by revenue from advertising.

The CBC operates six main domestic services: an English television network, a French television network, an English AM radio network, a French AM radio network, an FM radio service in some major cities, and a special radio service to northern communities, through standard band stations and shortwave. Radio Canada International operates a multilingual shortwave and transcription service to foreign countries.

Radio and television outlets for CBC service total 741. Of these, 342 are TV stations (VHF) and their satellites, including 211 which are privately-owned and 131 owned and operated by the CBC. Radio transmitters total 399, including 44 stations and 255 low power relay transmitters of the CBC, plus 100 privately-owned stations. This is a unique feature of the Canadian system, that many privately-owned radio and television stations are affiliated with the publicly-owned body and assist in distributing the national program service.

CBC English and French television networks together cover 98.8 percent of the total Canadian population. CBC English and French radio networks together cover 98.6 percent of the population.

Assignments Affecting Borders

Channel Allocations for Canada and Mexico

Allocations within 250 miles of Canadian and Mexican borders are as agreed upon by U.S. and respective countries through exchange of diplomatic notes. Though allocations beyond 250 miles of border do not require agreement between countries, Canada unofficially reports assignments beyond 250 miles; Mexico reports VHF within 250 miles, UHF within 200 miles.

Plus (+) and Minus (-) symbols designate offset carrier positions of channels
(L) indicates limited allocation under "Working Arrangement" of Canadian-U.S.A.
Television Agreement of 1952 as modified.

Retirement.

The end of work, or the beginning of worry?

Most people look toward retirement as a time of relaxation and enjoyment. And it can be if you prepare for it. But if you don't, it can be a time of worry and discontentment. A time when you can look back and think of a million ways that you could have saved, but didn't.

Well, there's no better time to think about retirement than now, while you're working.

One easy way to save on a regular basis is by purchasing U.S. Savings Bonds through the Payroll Savings Plan where you work.

Now there's a bonus interest rate on all U.S. Savings Bonds—for F. Bonds, 5½% when held to maturity of 5 years, 10 months

(4% the first year). That extra ½%, payable as a bonus at maturity, applies to all Bonds issued since June 1, 1970... with a comparable improvement for all older Bonds.

Buy U.S. Savings Bonds. They'll help make your retirement just what you want it to be.

Bonds are safe. If lost, stolen, or destroyed, we replace them. When needed, they can be cashed at your bank. Tax may be deferred until redemption. And always remember, Bonds are a proud way to save.

Take stock in America.

Now Bonds pay a bonus at maturity.

 The U.S. Government does not pay for this advertisement. It is presented as a public service in cooperation with The Department of the Treasury and The Advertising Council.

"There are only two forces that can carry light to all corners of the globe—the sun in the heavens and The Associated Press down here."

MARK TWAIN, 1906

That's right. Mark Twain said it years ago—long before the world developed the added force of electronics and cable technology to help carry enlightenment to the people.

Today, hundreds of CATV systems share in the common purpose of providing news and information to the public. AP NewsCable, serving more systems than all other news suppliers combined, contributes the talents and services of thousands of AP writers and technicians all over the world.

Equally important to CATV subscribers is the fact that AP's staff operates within every state in the nation. No other news supplier can match that capability.

That's why, in addition to every other news category, AP NewsCable provides *full coverage of your*

own state—local weather forecasts, high school sports, state capitol coverage, etc. Plus stocks, world news and sports, features... all constantly updated and displayed automatically in color... with different categories on different channels if desired.

And there are color-slide newspictures and Teletype printer read-outs in case you're originating local news cablecasts.

For information, call your nearest AP bureau... in principal cities of every state... or contact Bob Sundy at AP headquarters, 50 Rockefeller Plaza, New York 10020. Phone: (212) 262-4014.

The new concept in Children's Television: Reality.

The kids who grew up on Sesame Street won't stand for Zappo the Wonder Bird any more. At least not when the real world is more exciting.

What's it like to be an aquanaut?

To take a camping trip in the Everglades?

To fly with the Blue Angels?

Next season's *Earth Lab* shows them... eight to fourteen year olds (whose main occupation anyway is chasing their parents with questions). Rex Trailer is superhost—a pilot, horseman, underwater explorer, photographer and musician. He takes kids—real kids—up in the air in a glider, down the Colorado River rapids in a raft, through the interior of a submarine. For the new season, there'll be shows themed around news (how reporters gather and present it), homes (will we all be living underwater twenty years from now?), sports and teamwork, the emotions, violence and aggression.

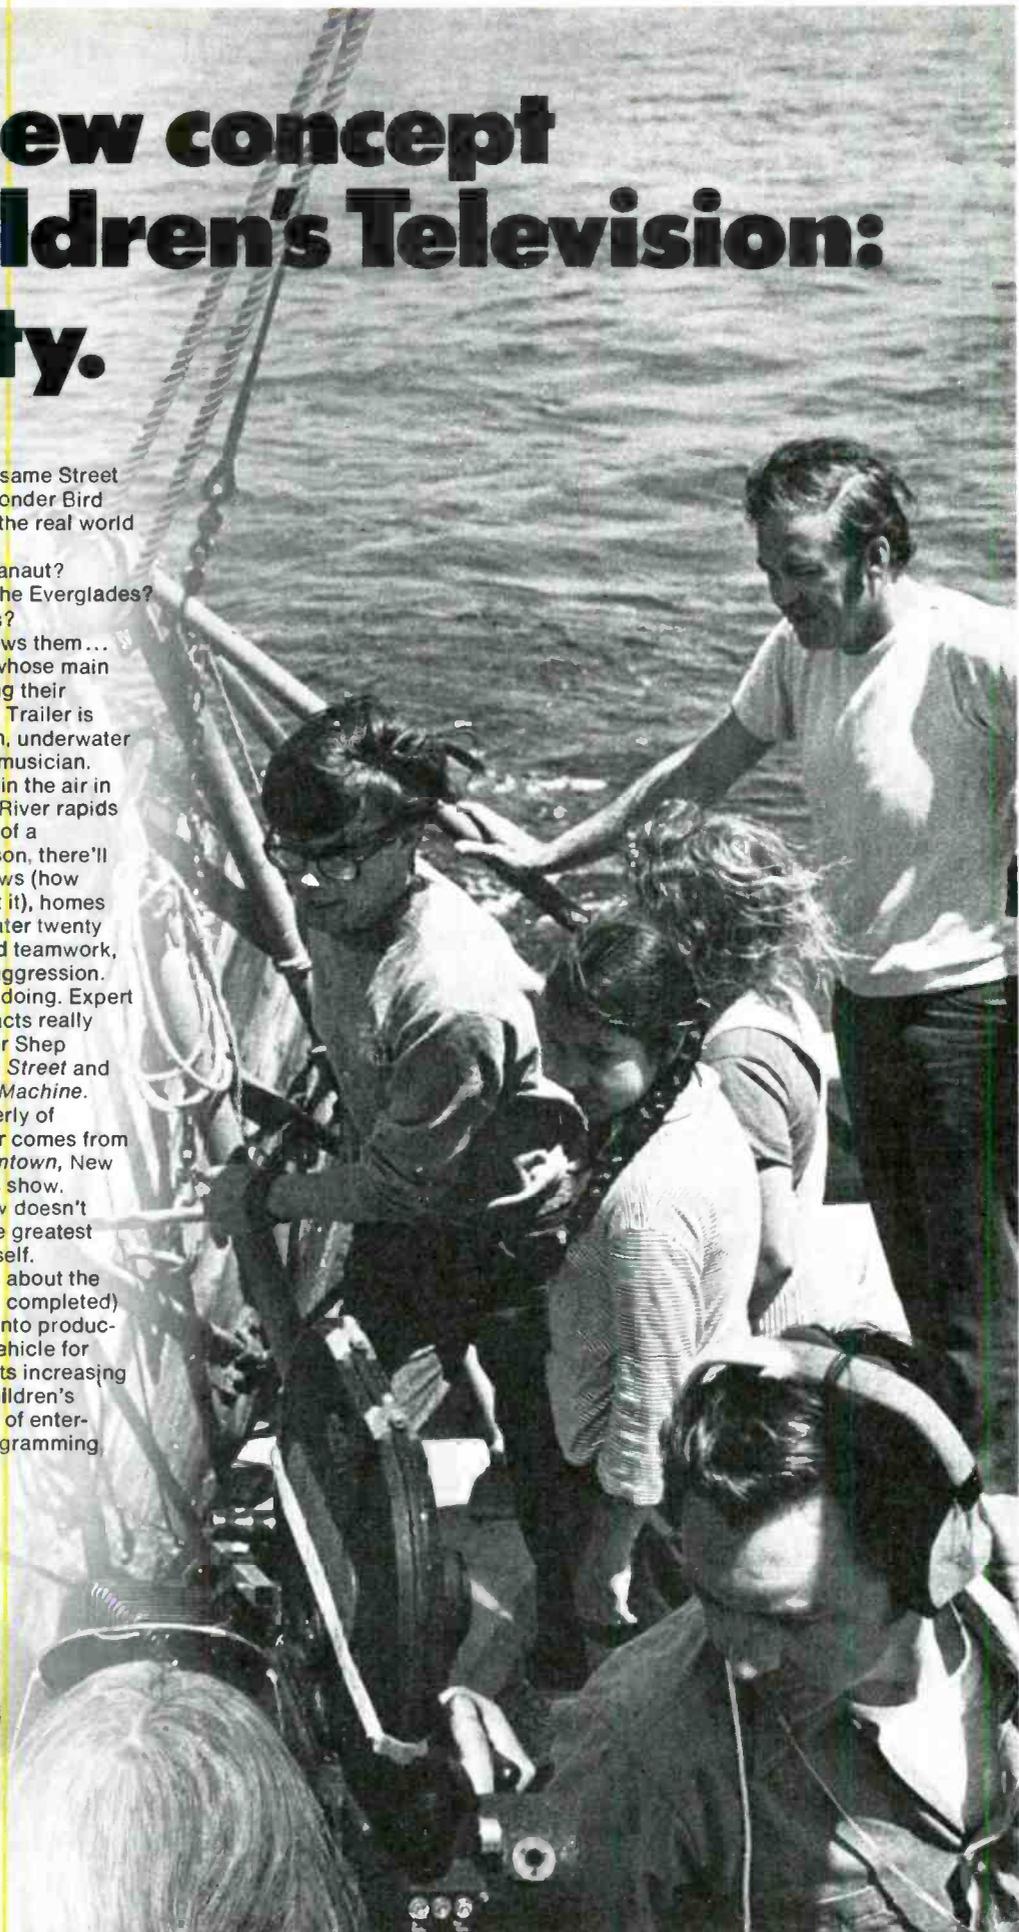

Earth Lab knows what it's doing. Expert consultants make sure the facts really are facts. Executive producer Shep Morgan comes from *Sesame Street* and *The Great American Dream Machine*. Writer Howard Jaffe is formerly of *Wonderama*. And Rex Trailer comes from fifteen years of hosting *Boomtown*, New England's favorite children's show.

A good children's TV show doesn't have to be dull. Not when the greatest show on earth is the earth itself.

Ask Group W Productions about the first 26-show series (already completed) and the second (now going into production). *Earth Lab* is an ideal vehicle for serving the community and its increasing demands for constructive children's shows. One full hour a week of entertaining and instructional programming

Television Translator Stations

As of March 30, 1972

Vhf and Uhf Channels

Dagger (†) preceding a listing indicates station(s) are licensed. Asterisk (*) preceding a listing indicates construction permit(s). Absence of symbols indicates application only. When a community has a translator licensed and another with a construction permit only, these symbols precede call letters.

Transmitter power output (TPO) is given at end of each listing; all vhf's are one watt (1-w), unless otherwise indicated.

Channel numbers are contained in call letters: For example, Ch. 3 is indicated for Clear, Alaska, by K03BE; symbols ## indicate call letters not yet assigned. Call letters and location of station repeated are in parentheses.

This listing includes all existing & proposed translator stations, including those which are owned & operated by television stations. Translators owned & operated by television stations also are listed separately, immediately following this section.

This race goes not to the swiftest, but the best:

Our proud new solid state, modular 100 Watt UHF Translator

Two tough years of research and testing have resulted in a new solid state, modular translator designed for quality performance, reliability and ease of maintenance. Here's a unit that is completely solid state with the exception of the final amplifier tube.

This same modular design is now available in the new 1 watt and 10 watt all solid state UHF translators . . . from the people whose business IS translators.

By the way, other recent additions to the performance-proven EMCEE translator line are the solid state 1 watt and 10 watt VHF units.

Get complete information on the EMCEE line of solid state UHF and VHF translators. Ask for the latest data sheets.

Via Satellite

These are some of the places you have already been via satellite.

We don't know exactly where you will be going this year. But one thing is certain. Through the magic window of your TV screen, Comsat will be taking you where history is happening, via satellite.

Comsat, a shareholder-owned communications com-

pany, operates the satellites in the global system from Washington, D.C....the U.S. earth stations for satellite communications...the COMSAT Laboratories and a wide range of related technical activities that are creating new communications advances.

These operations are all part of a worldwide satellite system designed to give you

better communications. They are pioneering new potentials for U.S. domestic, as well as international telephone, television, telegraph, data and facsimile communications.

In the United States, when it's via satellite, it's via Comsat.

Write to Comsat's Information Office for the booklet, "Via Satellite, the Comsat Story."

2400

CHARACTER GENERATOR AND MEMORY SYSTEM

Every TV and CATV operator needs it . . . and even the smallest can afford it! Titlemaster is a low-cost, self-contained electronic character generator designed for broadcast, CATV or CCTV.

Captions and announcements prepared on the typewriter-like keyboard are stored in an integrated circuit memory and converted to an EIA compatible signal for display on any video monitor. Model 1500 stores a full page of data, while Model 2400 stores up to four full pages.

And here's the best part: You can record any message onto a standard audio cartridge, via an optional interface from the Titlemaster keyboard to a SPOTMASTER or other tape cartridge recorder. Play it back whenever you wish . . . as often as you like.

- Ideal for election coverage, news bulletins, editorials, weather, sports, program announcements, commercials, etc.
- Display format of 15 lines, 32 characters each (Model 1500); or 8 lines, 16 characters each (Model 2400); full 64-character keyboard.
- Keyboard controlled "flashing" or "blinking" PLUS "roll" (from bottom of screen to top) PLUS horizontal "crawl"—fast or slow.
- Internal or external sync; composite video output.
- Ready for immediate delivery!

Two of our shows won 1st place Major Armstrong Awards this year:

They can be had.

The Major Armstrong Awards, as you know, are for excellence in FM broadcasting. In the commercial category:

"Midnight Special" (produced for BFA by WFMT in Chicago) won for best musical series.

"The Studs Terkel Show" (the same) won as best educational series.

You can get both of them. And they're sponsorable.

Who says public affairs broadcasting has to be dull? Put another way: public affairs broadcasting *can* win awards and listeners.

Now then: The Broadcasting Foundation of America is a broadcast programming service chartered (as an educational institution) by the New York State Board of Regents. We have programming of interest to you as follows:

Talk and Entertainment

The famous "Midnight Special" originated by Mike Nichols. 1 hour a week of folk music and humor at its best.

"The Studs Terkel Show" · Provocative documentaries and interviews by the best-selling author—with celebrities (and, occasionally, some who are not so celebrated).

"This is Your World". Discussions of environmental situations: ecology, social change, culture, race relations—by experts around the world. 15 minutes per week.

"Starcaster". 2-minute vignettes of the world around us. By Hayden Planetarium astronomers.

And more.

Music

"International Music Festival Series". Complete, live concerts from the great festivals: Salzburg, Vienna, Spoleto, Norway's Bergen Festival, Prague, etc. Karajan, Kubelik, Gilels, Fischer-Dieskau. 1½ to 2 hour programs.

"The First Fifty Years". Great vocal performances from the first 50 years of recording. Caruso, Melba, Tetrzzini, etc.—with a droll commentary by the producer, Marty Robinson. 30 min. per week.

And others.

News Analysis & Press Reviews

"The International Press Review Series". World opinion on important current issues—as reflected in editorials in the influential newspapers. A multiple series. Fourteen countries available. 15-min. programs, from the place(s) selected. Or a 5-minute daily capsule.

"Overseas Assignment". A weekly report, on the spot, where major international developments occur. By distinguished BBC journalists. Literate, timely. 30 minutes, weekly.

And more.

Science, Education, Travel, The Arts

In this category, BFA has produced a group of extraordinary series of 30-minute programs for weekly broadcast:

"The International Science Report". Visits to research centers and laboratories around the world. The latest developments, the leading scientists in person.

"Panorama of the Lively Arts". An unusual documentary approach to the arts around the world: performances, rehearsals, interviews, films, theater, music, painting, sculpture.

And others: "International Almanac", a country-by-country, armchair travel series on culture around the world; "New Dimensions of Education", about what's new and constructive in contemporary teaching and learning.

Unusual—and Newly Available

"Musicanada"—a 15-minute weekly series devoted exclusively to Canadian music: folk, rock, jazz, pop.

"Age of Amberola"—a series of 6 programs of the first and early Edison wax cylinder recordings. Retrieved by new electronic techniques.

"Danger, Man at Work"—a series of 8, 15-minute UNESCO programs on salvaging our "battered biosphere".

"To Turn the Other Cheek"—twelve 15-minute discussions on aggression in man and animals.

And—we seem to have run out of space.
