# TARGET/AID SEPARATES THE MEN FROM THE BOYS

Even the men 18-24 from the boys 18-24. Not to mention the boys from the girls, the old money from the new money, the Mercedes set from the tractor set from the Mercedes *and* tractor set... In fact, TARGET/AID helps to define audiences to a degree never possible before.

TARGET/AID® uses ClusterPlus™, a powerful marketing segmentation tool developed by Donnelley Marketing Information Services and Simmons Market Research Bureau, to profile a market or an audience by lifestyle characteristics. That gives you a big advantage over just age and sex demographics,

# MEN

because lifestyles are much better indicators of the products and services consumers are likely to buy.

TARGET/AID can bring a whole new perspective to broadcast advertising.

Now you can determine more than just the specific demographics of a broadcast audience; you can see what kind of *consumers* those numbers represent.

TARGET/AID lets you sharpen and refine your sales and marketing approach. You can differentiate stations, programming and formats from others with seemingly identical audience ratings. Even markets with similar rankings can be totally different when you examine the lifestyles of their populations.

TARGET/AID is the tool that allows you to pinpoint those audience differences and use them to your advantage.

That means a better selling approach for stations and better buying strategies for advertisers.

So whether your audience drives a tractor, or a Mercedes or both, TARGET/AID can help you identify your targets and deliver them more efficiently. Because TARGET/AID defines audiences like never before.

## Come Help Us Celebrate The Child

St. Jude Children's Research Hospital continues its desperate search for life-saving knowledge about childhood catastrophic diseases.

As a research center devoted entirely to the quest for the cause, cure and prevention of the illnesses that destroy the lives of too many of the world's children, the staff at St. Jude celebrates life with each new finding.

Each priceless new procedure, even those that have made some incurable diseases curable, shows how elusive the ultimate goal remains. Research offers the only firm hope.

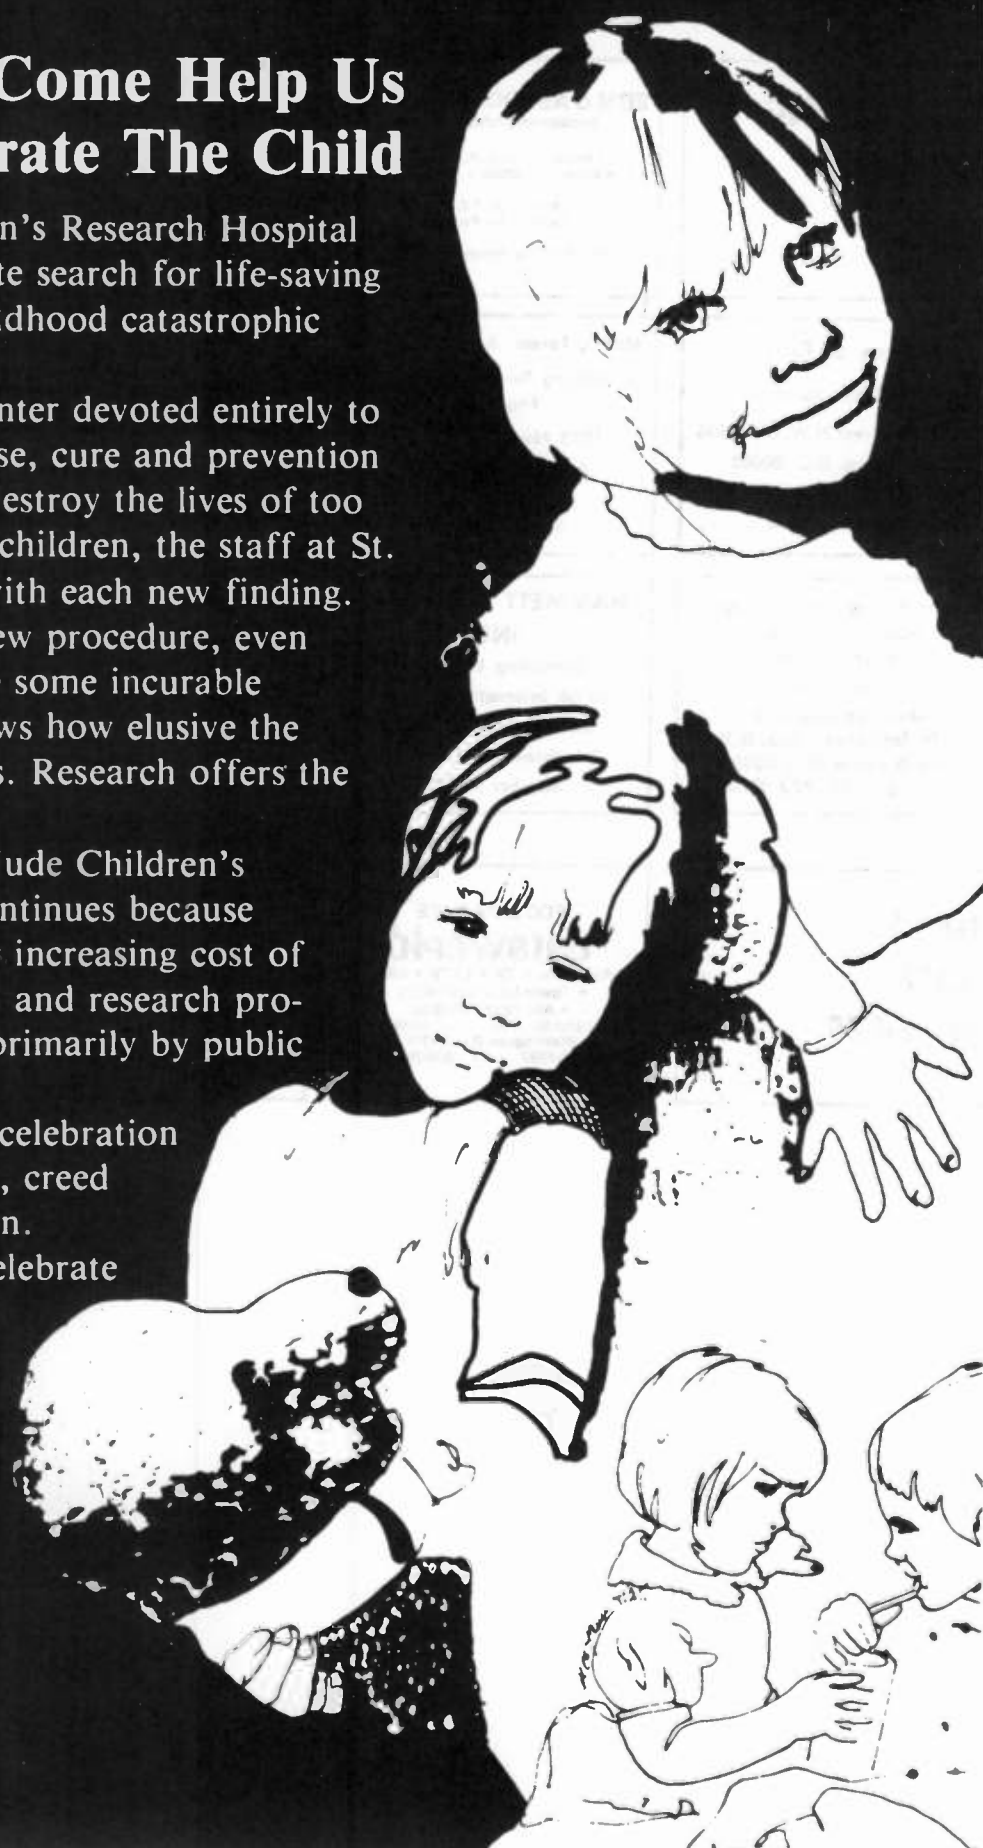

Research at St. Jude Children's Research Hospital continues because people care. The ever increasing cost of treatment, equipment and research programs has been met primarily by public contributions.

This miraculous celebration of life knows no race, creed or financial distinction.

Come, help us celebrate the child. Please send your tax-deductible check or request for further information to St. Jude, 505 N. Parkway, Memphis, TN 38105.

ST. JUDE CHILDREN'S  
RESEARCH HOSPITAL

# Armed Forces Television Stations

All stations are operated by the Military Departments under the jurisdiction of the Department of Defense. The Assistant Secretary of Defense (Public Affairs) provides policy and operational direction through the Director, American Forces Information Service (AFIS), 1735 N. Lynn St., Arlington, Va. 22209. The Armed Forces Radio & Television Service (AFRTS) Programming Center, Los Angeles, under the jurisdiction of AFIS ships the bulk of the television programs to the stations. The U.S. commercial networks provide television programs to AFRTS. Contact with the stations may be made by writing to AFRTS-PC, 1016 N. McCadden Place, Los Angeles, Cal. 90038.

**INDEPENDENT BROADCASTING AUTHORITY**—70 Brompton Road, London, SW3 1EY. Telephone: 01-584-7011. Telex: 24345. The Authority was created by Parliament in 1954 as Independent Television Authority to provide a comprehensive television service additional to that of BBC. In 1972, it was renamed the Independent Broadcasting Authority and its functions were extended to provide an Independent Local Radio service.

The Authority selects and appoints the program companies; supervises programs provided by the contractors and their scheduling; controls the advertising; builds, owns & operates the transmitting stations. Fifteen companies provide programs in fourteen independent television regions of the United Kingdom (2 companies share the contract for London). As part of its review of the ITV system, the Authority, in Dec. 1980, offered a contract to broadcast a new national breakfast-time television service, which started in May 1983, to TV-AM. In addition, changes were made to some ITV companies. Currently, 34 Independent Local Radio stations provide program service in 33 areas (2 operate in London). Further stations are planned over the next few years. Both services are financed mainly by the sale of advertising time.

**Members of the Authority:** Lord Thomson of Monifieth, chairman; Sir John Riddell, deputy chairman; Mrs. Y. Conolly; Mrs. J. D. M. Jowitt; Professor A. Cullen; Mrs. P. Ridley; Sir Denis Hamilton; Rev. Dr. W. J. Morris; Mrs. J. McIvor; A. M. G. Christopher; G. Russell.

**Permanent Staff:** J. Whitney, director general; A. W. Pragnell, deputy director general; K. W. Blyth, chief assistant to the Director General; C. D. Shaw, director of television; D. Glencross, deputy director of television; P. Jones, chief assistant, television; J. B. Thompson, director of radio; P. A. C. Baldwin, deputy director of radio; A. Blackstock, head of radio finance; E. Riddell, chief radio programming officer; T. S. Robson, director of engineering; Dr. G. B. # Comark's "S" Series UHF Television Transmitters

*Simply Superior*

10kW/30kW/55kW model shown

**Integrating high efficiency, reliability and low cost, each model incorporates state-of-the-art technologies to achieve a unique combination of unparalleled features:**

- External cavity, full-band, field proven, klystron power amplifiers, combining highest efficiency and compact size.
- Broadband (no tuning); high power, Exciter System, featuring dual channel (redundant) operation as well as Comark's CM-100S Broadcast Modulator with IF S.A.W. filter.
- Space efficient, mechanical and electrical layouts, fully engineered for maximum EMI/RFI isolation and overall operator convenience.
- Fiber optic telemetry for all floating high voltage metering functions, incorporated into a complete, remote control-compatible, latched fault and status display system.
- Clean, fully isolated, high voltage compartments, with double-filtered air cooling and front access. (No exposed high voltage in klystron areas.)

Comark's "S" Series transmitters are available from 10kW through 220kW with advanced system options, including beam current pulsers, motorized RF switching systems, E.D. and ICPM correction systems, and the services of Comark's 24-hour field operations group.
