TV STATIONS 1994

The Authoritative Reference for the Television, Cable & Electronics Industries

Published by Warren Publishing, Inc., 2115 Ward Court, N.W., Washington, D.C. 20037

Stations Volume No. ● **62** ● 1994 Edition

In 1986, Comark invented IOT transmission technology. Eight years later, we still set the world's standard.

Despite what you may have heard, IOT technology wasn't born yesterday. We saw its potential to change the transmitter industry quite some time ago.

We showed the first Klystron amplifier at NAB in 1986, and put the first IOT transmitter into full-time broadcast service in 1988. Since then, we've used more than three million hours of on-the-air experience to lead the way in IOT research & development.

In 1991, our patented aural carrier corrector technology and advanced linearity corrector were developed to meet today's requirements for high efficiency common amplification transmission. And in 1992 we introduced the exclusive DUAL USE™ system that lets you operate with NTSC today and, in the future, convert to D-HDTV.

But we didn't stop there. At NAB 1993, we introduced our third

generation IOT system, the IOX. Its ultra linear Class A drivers, optically-isolated solid state control logic, constant impedance output filter, leading-edge crowbar design and IEC-215 implementation make it the most advanced UHF-TV transmitter in the world today.

So if you're looking for the most advanced, proven IOT solution, go with the company that's been pioneering the technology for eight years—not eight months. For more information, or to request a set of our latest HDTV TECH BRIEFS™ call us today at 1-800-688-3669.

Most of the World uses Varian Satcom HPAs

We Can Help the Rest Discover Why.

You won't have to travel far to see a Varian satcom high power amplifier (HPA) in action. Fact is, we have installations in 73% of the countries around the world—for unparalleled reasons.

For one thing, we offer the most complete line of amplifiers, covering a wide range of power levels in every satcom uplink band, to meet customers' exact needs.

Our products are backed by world renowned support from seven Varian factory service centers strategically

located around the globe, along with 24-hour phone support, rapid response and comprehensive service agreements to help you get the most out of your investment. Any time. Any place.

To learn more, give us a call and discover the benefits of being in the upper percentile.

Nature has its own
professionals of
sound and vision.

The wonders of sound and vision found in nature are hard to reproduce. In fact, if anyone has come close it's EEV.

Whatever your broadcast requirements, you'll find EEV has the technology to match. High-efficiency UHF Television Klystrons from 5kW to 70kW for Television Transmitters. A range of Broadcast Tetrodes and Vacuum Capacitors for AM and FM transmitters, and Leddicon® camera tubes to fit virtually every broadcast color camera available today.

Our experience is the key to technological leadership. Our manufacturing know-how ensures the highest quality and reliability. Above all, our professional dedication to our customers' needs makes us the natural choice of broadcasters the world over.

® Leddicon is the Registered
Trade Mark of EEV Lead Oxide
Camera Tubes.

Description of Station Directory Section

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

(The composite maps and all other contents of this book are copyrighted by Warren Publishing, Inc., publishers of Television & Cable Factbook. The American Map Corp. (46-35 54th Rd., Maspeth, NY 11378), is the copyright owner of the base maps which are reprinted herein under License No. 19239-D. ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1992 and 1993.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1993 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys. (Data from *The Arbitron Company* are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the *The Arbitron Company*, 142 West 57th St., New York, NY 10019.)

DEFINITIONS OF ARBITRON TERMS

Total Households—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1993 and rounded to the nearest hundred. These estimates include households on military installations.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Net Weekly Circulation—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

EDITOR'S NOTE: Total Households listed for each station in this Volume of the Television and Cable Factbook do not include households in any county in which the station's circulation is less than 5%. The counties appearing in the circulation report are listed alphabetically by state. The states are arranged alphabetically by two-letter state abbreviations.

SURVEY METHODS, DESCRIBED BY ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county.

At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the *Factbook* is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this *Factbook* was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number had not been

assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the *Factbook*.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of *Factbook* publication.

Latitude and longitude coordinates on the station pages are taken from the FCC's official files. They currently are based on the North American Datum of 1927 (NAD 27). In 1994, the FCC will begin converting records to reflect the North American Datum of 1983 (NAD 83). The *Factbook* will continue to reflect accurately the data as on file at the FCC.

U.S. Television Station Index

Data updated to November 1, 1993 unless otherwise indicated. Includes rate digests, personnel, facilities and other data.

THE STATE PAGES

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Household Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of November 1, 1993.

STATION PAGES

Rates, personnel and other data supplied by stations.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards available from the stations on request.

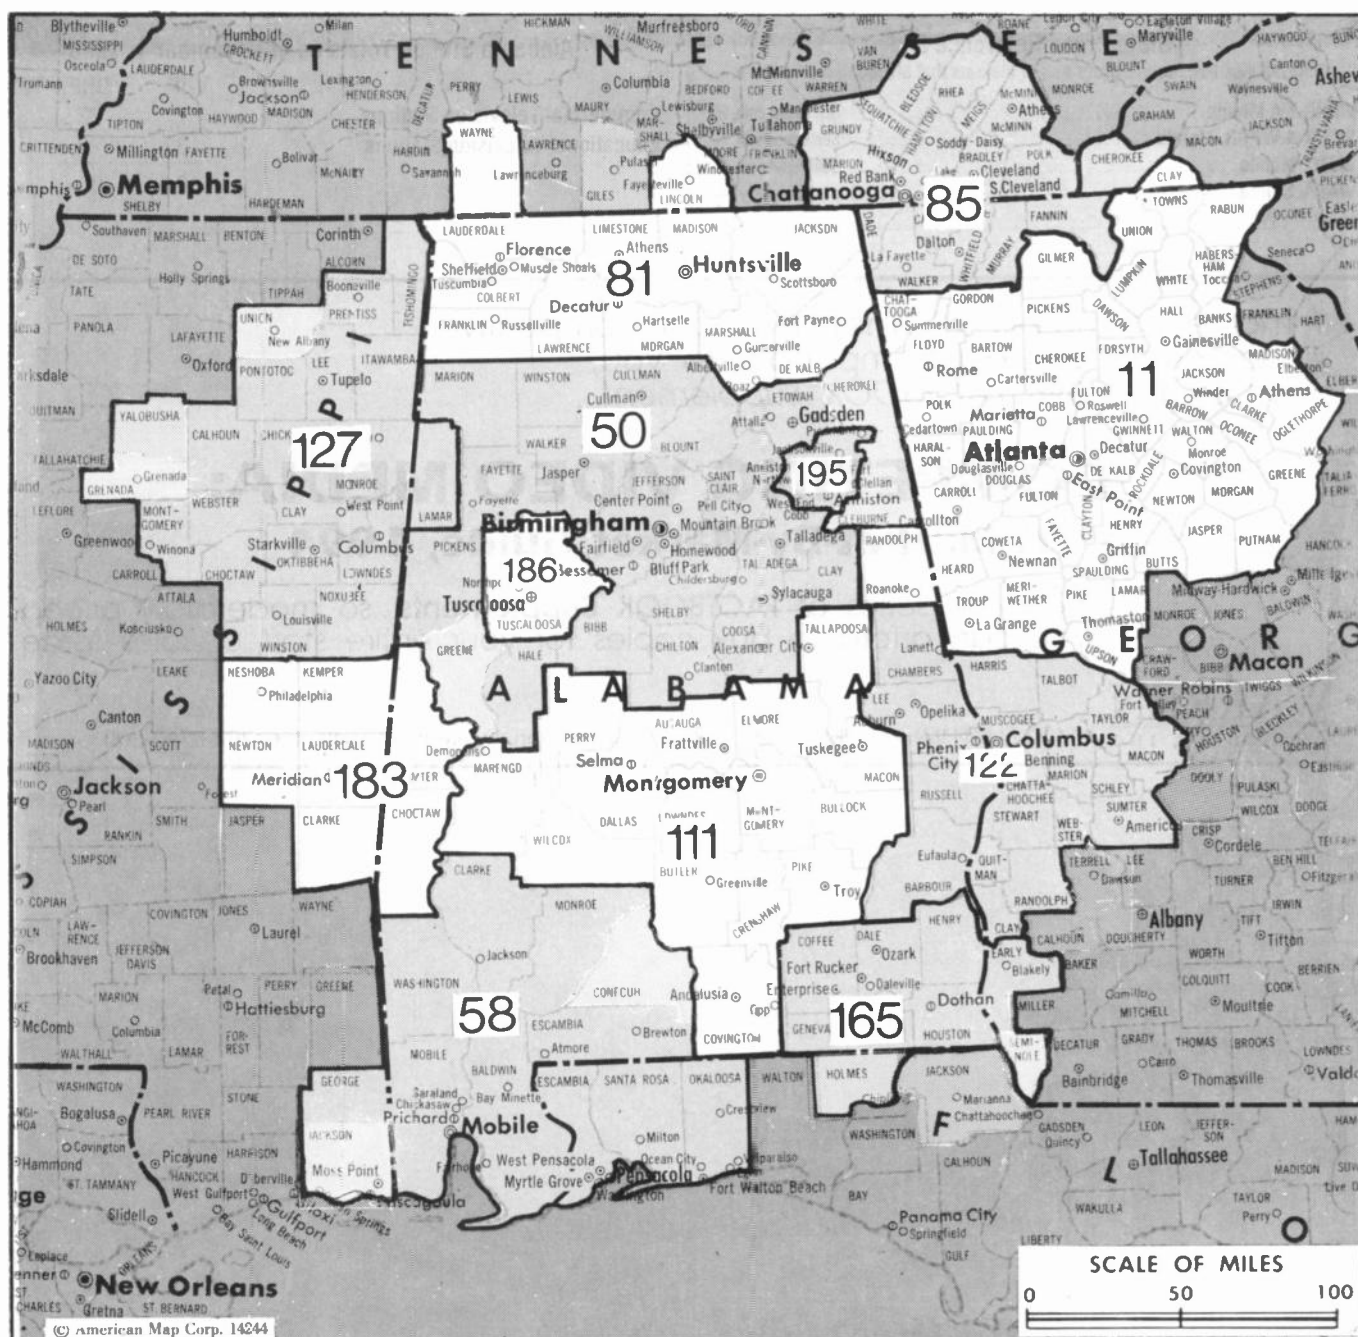

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks):

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each County individually. For definitions of Arbitron terms, see Introduction.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

**“...the most
authoritative
source.”**

**Darrel Cunningham
General Manager
KHBS-TV
Fort Smith, AR**

Darrel is one of thousands of engineers, programmers, general managers and financial people who get and regularly use the **Television & Cable Factbook**.

Pictured above (*left*) with news director, Craig Cannon, Darrel told us, “ Since we got our *SKYLINK* satellite news gathering vehicle, we talk to TV stations all over the country.”

Darrel and Craig are two of the most important decision makers in our business because they can say, “*Yes, we’ll buy!*”

KHBS-TV is one of hundreds of stations that use the Factbook. In fact, more than 4.31 different decision-makers and influencers refer to each **Television & Cable Factbook** 10.18 times every month. In other words, 23,705 top-level executives

will see your advertising message more than 241,000 times monthly! Over 63% are in upper-level management, and 30% have mid-level management positions.

Your ad in the **Television & Cable Factbook** costs about the same as those placed in weeklies and monthlies. Yet a single ad will represent your company over and over all year long.

If you want to reach the men and women who can say “*Yes*” to you, plan now to have a space like this in next year’s book while good positions are still available. Contact Gene Edwards, Advertising Director, for our media kit which will have all the details on our rates, availabilities and research. It’s not too soon to be planning for your ad in our next volume!

The biweekly newsletter that covers everything that's happening in public broadcasting... the news and the facts behind the news...

PUBLIC BROADCASTING REPORT

Public Broadcasting Report is the totally independent information service that covers significant developments on all public broadcasting fronts... from CPB and PBS to NPR and other network programming... from marketing innovations to new technologies... you will follow all the action, *as it develops!*

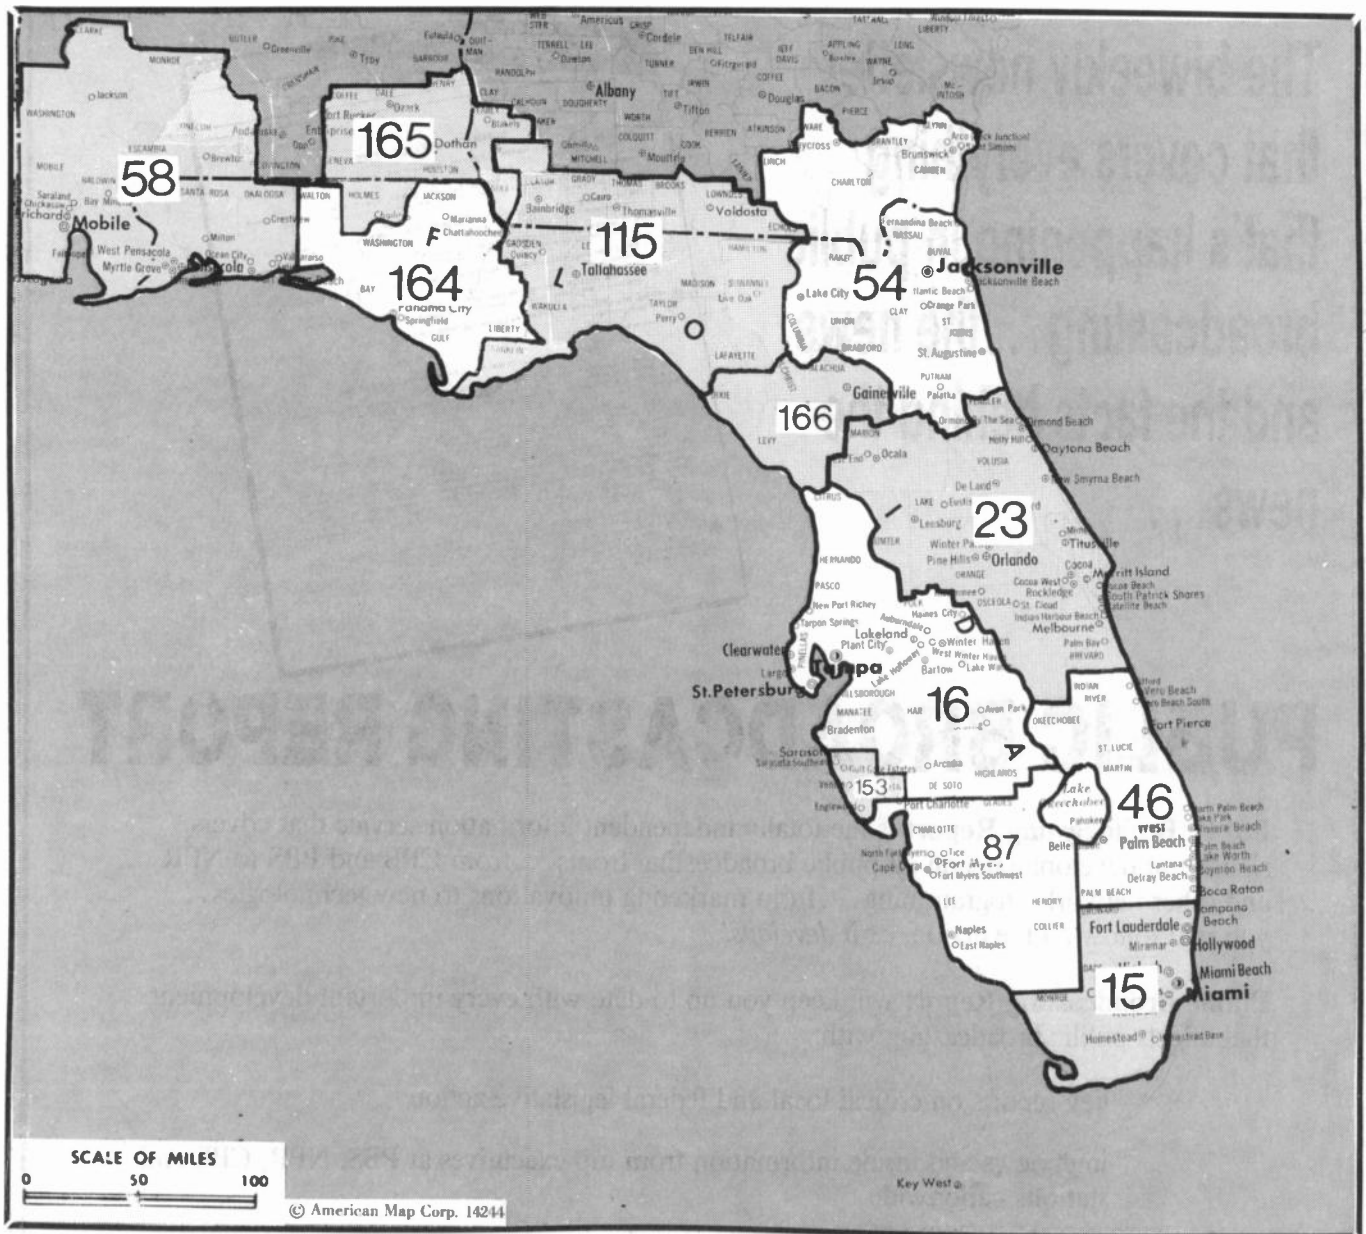

Public Broadcasting Report will keep you up to date with every important development that affects public broadcasting with:

- key reports on critical local and federal legislative action
- interviews and inside information from top executives at PBS, NPR, CPB and stations nationwide
- coverage of the latest industry studies and research
- in-depth analyses of regulatory developments
- early warnings about grants and awards complete with application deadlines

If you have a stake in public broadcasting, a personal subscription to PBR could make a substantial difference in your ability to pursue funding, spot trends, anticipate the impact of developments and make even more informed business decisions.

For subscription information, call collect: (202) 872-9200.

Want More Bang For Your Bucks?

Need something special? Out of the ordinary? Call Us. *WTMV is the station it pays to watch...and advertise with!*

We Are HOT! HOT! HOT!

WTMV gets viewers involved through a constant stream of promotions and giveaways. They are active, not passive. They pay attention to what they see and hear on TV-32.

WTMV is one of the nation's few remaining locally owned and operated stations. Audience measurement figures don't tell you what TV-32 can do for you!

One Of A Kind!

WTMV is advertiser friendly. Tuned to the community and to the needs of our advertisers. TV-32 will try hard to make you an offer you can't refuse!

*With **Communications Daily**
you get the news first!
you get the news right!
you get the news every
business day!*

*(and, if you require it, as many do, you can get the
news instantly via the electronic information services,
NEWSNET, NEXIS, DIALOG, MCI Mail or facsimile)*

The Electronic Editions of **Communications Daily** (all you need is a data terminal, communicating word processor or high-speed facsimile machine) . . .

1. **NewsNet.** Every day, immediate delivery and optional access to all our specialized newsletters along with a programmable electronic "clip" service. For just a few dollars a day, the full text of **Communications Daily** can be ready to help you as soon as you are ready to start work. NewsNet is a service of Independent Publications Inc. of Bryn Mawr, PA.
2. **Nexis.** The world's largest full-text news database now includes **Communications Daily**. Nexis is a vast and growing electronic library that features powerful capabilities to search and retrieve information from hundreds of sources. Nexis is a service of Mead Data Central.
3. **Dialog.** The new PTS NEWSLETTER DATABASE (file 636) includes full text access to more than 120 newsletters including **Communications Daily**. A service of Predicasts.
4. **MCI Mail.** If you prefer, we can send you the full text of **Communications Daily** via electronic-mail. A service of MCI Communications Corporation.
5. **Facsimile.** By special arrangement, we can transmit **Communications Daily** to your digital facsimile machine anywhere in the world. A new service of **Communications Daily**.

*If you would like more information about the Electronic Editions of **Communications Daily**, call our circulation department collect at 202-872-9200.*

KGMD-TV

Ch. 9

(Satellite of KGMB, Honolulu)

Network Service: CBS.

Licensee: Lee Enterprises Inc., 400 Putnam Bldg., 215 N. Main St, Davenport, IA 52801-1924.

Studio: See KGMB, Honolulu.

Telephone: 808-935-6221.

Technical Facilities: Channel No. 9 (186-192 MHz). Authorized power: 9.68-kw visual, 1.71-kw aural. Antenna: Minus 290-ft. above av. terrain, 258-ft. above ground, 1120-ft. above sea level.

Latitude	19°	43'	00"
Longitude	155°	08'	13"

Transmitter: 58 Manaolana Place.

Ownership: Lee Enterprises Inc. (Group Owner).

Began Operation: May 15, 1955.

Represented (sales): Katz Television.

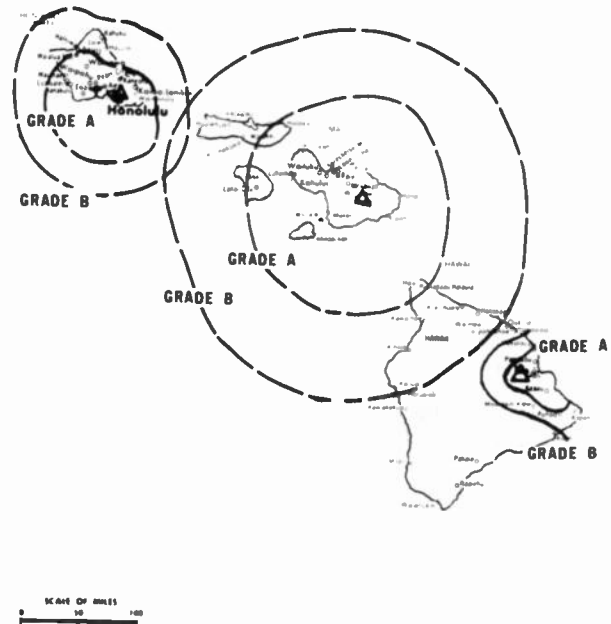

Represented (legal): Watanabe, Ing, Kawashima.

Personnel:

Oick Grimm, General Manager.

Rates: Sold in combination with KGMB, Honolulu & KGMV, Wailuku with rates applying to simultaneous telecasts on all three stations.

NETWORK BASE HOURLY RATE: Bonus to KGMB, Honolulu.

City of License: Hilo.

Hawaii—Hilo

KHAW-TV

Ch. 11

(Satellite of KHON-TV, Honolulu)

Network Service: NBC.

Licensee: BBC License Subsidiary, 980 N. Michigan Ave., Suite 1200, Chicago, IL 60611.

Studio: See KHON-TV, Honolulu.

Telephone: 808-531-8585.

Technical Facilities: Channel No. 11 (198-204 MHz). Authorized power: 2.09-kw visual, 0.27-kw aural. Antenna: Minus 823-ft. above av. terrain, 80-ft. above ground, 90-ft. above sea level.

Latitude	19°	43'	56"
Longitude	155°	04'	09"

Transmitter: Naniloa Hotel, Hilo.

News Services: AP, CNN.

Ownership: Bumham Broadcasting Co. (Group Owner).

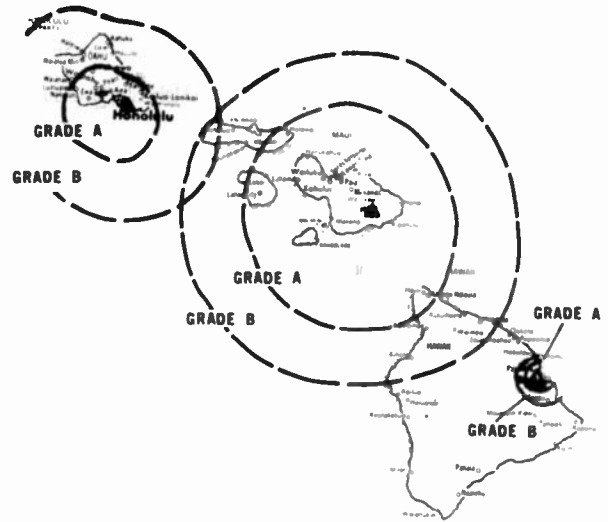

Began Operation: November 27, 1961.

Represented (sales): Harrington, Righter & Parsons Inc.

Personnel:

See KHON-TV, Honolulu.

Rates: Sold in combination with KHON-TV, Honolulu & KAI-TV Waikiki with rates applying to simultaneous telecasts on all stations.

Ownership: Bumham Broadcasting Co. (Group Owner).

Began Operation: December 17, 1958 on Ch. 13, and on Jan. 28, 1959 FCC granted temporary Ch. 13 operation by New Orleans Television Corp. (Television Digest, Vol. 14:51; 15:5). Supreme Bcstg. Co. started operation on Ch. 20 Nov. 1, 1953, using WJMR-TV call letters. In Oct. 1957, WJMR-TV began experimental operation on Ch. 12 but FCC ruled in 1958 that this operation was to close by Jan. 1, 1959 but WVUE did not begin on Ch. 12 until Sept. 1, 1962. Sale of 60% by New Orleans Television Inc. (Joseph A. Paretti and associates) to Screen Gems and contingent transfer by Rust Craft of its 40% to Screen Gems approved June 2, 1965 by FCC (Vol. 5:8, 23). Switched to Ch. 8 June 8, 1970. Sale to Gaylord Bcstg. approved by FCC June 30, 1977 (Vol. 16:26; 17:28). Sale to Bumham Bcstg. L.P. by Gaylord approved by FCC June 8, 1987 (Vol. 26:47; 27:3).

Telephones: 601-544-4730; 601-649-3111. Fax: 601-584-9302.

Technical Facilities: Channel No. 7 (174-180 MHz). Authorized power: 316-kw visual, 47-kw aural. Antenna: 529-ft. above av. terrain, 576-ft. above ground, 771-ft. above sea level.

Latitude 31° 27' 12"
Longitude 89° 17' 05"

Transmitter: U.S. Hwy. 11, approx. 1.2-mi. N of Eastabuchie.

Satellite Earth Stations: Harris, 8-meter; Harris, 3.5-meter; Avcom, Harris, M/A-Com receivers.

News Service: AP.

Ownership: Federal Broadcasting Co. (Group Owner).

Began Operation: June 8, 1956 on Ch. 9. Two months later WDSU-TV, New Orleans, acquired 51% interest, with remaining 49% being held equally by 4 founding partners, Dave A. & Harold M. Matison and Milton J. & Alvin H. Fine (Television Digest, Vol. 12:31, 38). Plant was sold to owners, who held CP for Ch. 7, Laurel, MS; when WDSU-TV received FCC authorization to shift WAFB-TV, Baton Rouge from Ch. 28 to Ch. 9 pending outcome of hearings, new owners began operation on Ch. 7 Sept. 3, 1959 (Vol. 13:44; 15:36). Sale of 43.75% to S. A. Rosenbaum as well as stock to Marvin Reuben & Jerry P. Keith by William S. Smylie family approved Dec. 7, 1960 by FCC (Vol. 16:49, 50). Sale to Beam Communications approved July 27, 1983. Sale to present owner approved Aug. 2, 1990.
