# Description of Station Directory Section

## THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each analog TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all analog stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official or uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

The standards for predicted contours as required by the FCC are as follows:

**Grade B Service:** The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

**Grade A Service:** Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

**Principal City Service:** Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

**Digital Service:** Satisfactory service expected at least 90% of the time for at least 50% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B." For stations which have filed applications to provide, have been granted a permit to provide, or are providing digital service, we publish a third contour line to represent predicted digital service. Digital contours are shown by a broken line.

*(The composite maps and all other contents of this book are copyrighted by Warren Communications News, publishers of Television & Cable Factbook. Reproduction in whole or part is prohibited without written permission.)*

## NIELSEN TV STATION CIRCULATION

The *Average Weekly Circulation* estimates are based on NSI (Nielsen Station Index) diary households from the most recent February, May, July and November survey periods. These Sunday-Saturday 7 a.m.-1 a.m. average quarter-hour tuning shares are based on commercial television stations only.

All viewing numbers include only those estimates which surpass 5%. The *Station DMA Total* estimates are for viewing within the station's Designated Market Area, as defined by Nielsen. The *Other DMA Total* estimates are for viewing in a Designated Market Area other than the station's. The *Grand Total* estimates are a sum of the Station and Other DMA totals. Some stations have no viewing over 5% outside the station DMA, and therefore do not show all three categories.

## DEFINITIONS OF NIELSEN TERMS

**Designated Market Area**—An area comprised of all counties wherein the combined share of audience for the home market commercial station(s) is larger than the combined share of audience for any station(s) assigned to another home market. In a few instances, a county has a marked division in household viewing patterns, so that the county is split by Nielsen, and each portion assigned to a DMA.

**Television Households**—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county, rounded and expressed in tens, are prepared annually by the Nielsen Research Department. Those estimates are derived by applying percent television set ownership estimates, county by county, to the estimates of total households made by Market Statistics.

**Cable Television Households**—A cable television household is an occupied dwelling unit which subscribes to some level of delivery service for television signals, rounded and expressed in tens.

**Non-Cable Television Households**—A television household which receives broadcast television signals, rounded and expressed in tens.

**TV Penetration**—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

**Average Weekly Circulation**—The estimated average number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

**Average Daily Circulation**—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

## SURVEY METHODS, DESCRIBED BY NIELSEN

Nielsen collects household tuning over a four week measurement period using a diary methodology. Telephone calls are made to a sample of listed and unlisted telephone numbers in the survey area. The telephone calls enlist the cooperation of the household for a one week survey, verify names and addresses among listed households and obtain names and addresses for unlisted households. In addition, the households are asked several basic questions regarding their household composition and television set ownership. Diaries are mailed to all households where an address is available. Reminder phone calls are made and mailings sent during the diary-keeping week to encourage the household to record their tuning and return the completed diary.

As diaries are returned, they are edited using established procedures and are entered into a computer system for processing. In order to compensate for differences in response rates, a weighting methodology is used to adjust the final intab sample data so that the weighted sample is in balance with the universe for various household characteristics—including geography. NSI measures the viewing in over 200 television markets across the United States at least four times a year.

## EXPLANATION OF FCC SYMBOLS

### FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. BPCDT: Broadcast Permit Commercial Digital Television.

5. BMPCDT: Broadcast Modification of Permit Commercial Digital Television.

6. GRANTED: Date of authorization by FCC.

**Note:** “BPCT” and “BMPCT” designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number for analog facilities to help reference the Commission’s official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. “Docket” numbers are used in those few cases where the application was in a hearing status and a file number had not been assigned. File numbers for digital facilities accompany those figures in the text of the listing. Call letters for digital facilities are currently simply the addition of “-DT” to the core call letters of the parallel analog station. The “granted” date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a “BLCT” (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a “BRCT” (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B and digital service contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

# U.S. Television Station Index

Data updated to October 1, 2005 unless otherwise indicated. Includes personnel, facilities and other data.

## THE STATE PAGES

Following the map of each state, rankings for Nielsen's Designated Market Area Television Households are shown if they are available. DMA Household Rank is established by Nielsen.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 1, 2005.

Alabama . . . . .	A-17
Alaska . . . . .	A-80

## STATION PAGES

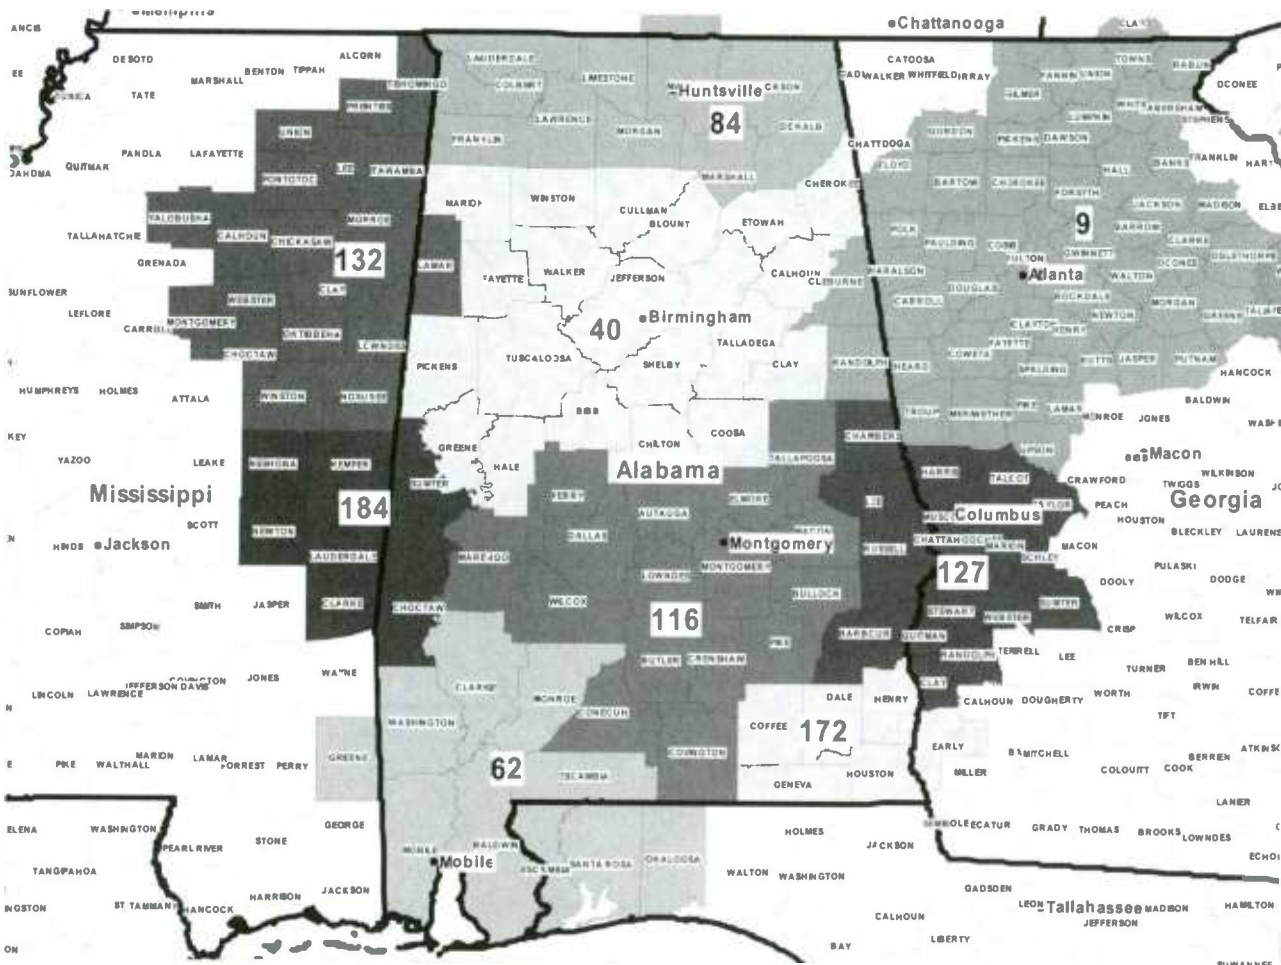

Rates, personnel and other data supplied by stations.

**RATE DIGESTS:** These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

**STATION POWER:** Powers shown are Effective Radiated Powers (ERP).

**NIELSEN DATA:** The individual stations show Total TV Households, both cable and non-cable, Average Weekly Circulation totals and an Average Daily Circulation total. For definitions of Nielsen terms, consult Description of Station section. These totals shown for circulation within the station DMA and outside it.

**Satellite Earth Stations:** Transmitter Comark; Scientific-Atlanta, 3.8-meter Ku-band; Paracclipse, 3.8-meter Ku-band.

**Ownership:** Entravision Communications Corp. (Group Owner).

**Began Operation:** August 4, 1954. Started as WGTH-TV, 55% owned by General Teleradio and 45% by Gannett's Hartford Times. Sale to CBS approved by FCC February 23, 1956; transfer reinstated by FCC September 11, 1956 after being held up by protest (Television Digest, Vol. 11:28, 12:8, 17, 37). After CBS took station off air November 15, 1958 (Vol. 14:45), sale to Edward D. Taddei and associates approved by FCC December 23, 1958 (Vol. 14:46, 49) and station returned to air on January 24, 1959. Transfer to RKO General subsidiary Hartford Phonevision Co. approved by FCC June 1, 1960 (Vol. 16:14, 23). Sale to Faith Center approved by FCC February 16, 1972. Distress sale by Faith Center approved by FCC September 27, 1983, contingent on finding Interstate Media to be suitable licensee & consummation of assignment within 90 days. Final approval granted December 23, 1983; but sale never consummated. Subsequent sale to Astroline Communications by Faith Center approved by FCC December 10, 1984 (Vol. 24:40, 51). Left air April 9, 1991 (Vol. 31:16). Returned to air February 7, 1997. Sale proposed in 1993 to Two If By Sea Broadcasting Corp.; in October 2000 FCC approved settlement with competing applicant which transferred station as WHCT-TV to Entravision.
