INTRODUCTION

The financial and operating data shown in this volume are compiled principally from annual reports filed with the Federal Communications Commission for the year 1948. Section A shows data obtained from reports of telephone, wire-telegraph, ocean-cable and radiotelegraph carriers, as well as reports from companies controlling these carriers. Section B of this publication contains data compiled from the annual reports received from broadcast stations and networks.

The yearbook, "Statistics of the Communications Industry in the United States", has been published for ten consecutive years commencing with the year 1939. Some of the tables prior to that date appeared in the Commission's Annual Reports to Congress, and some were released in mimeographed form.

Explanatory remarks pertaining to the coverage of the statistical data are included in the comments introducing Sections A and B.

SECTION A

**Financial and Operating Data Relative to
Telephone, Wire-Telegraph, Ocean-Cable,
and Radiotelegraph Carriers and
Controlling Companies**

General remarks.--Only those common carriers engaged in interstate, or foreign, communication service are subject to the full jurisdiction of the Commission, and required to file annual and monthly reports with the Commission under the provisions of the Communications Act of 1934, as amended. Virtually all carriers rendering wire-telegraph, ocean-cable, or radiotelegraph service are subject to the full jurisdiction of the Commission. A large number of telephone carriers engaged primarily in intrastate service are not fully subject to the Communications Act of 1934, and are not required to file reports. Notwithstanding, a few of the intrastate telephone carriers file annual reports, and a considerable number file monthly reports for statistical purposes. It is believed that the telephone tabulations presented in Section A include telephone carriers receiving over 90 percent of the operating revenues of the industry.

Financial data from annual reports.--This publication shows items of outstanding interest compiled from annual reports in summary form, and by individual companies. Details of financial and operating data are shown for telephone carriers whose average annual operating revenues exceeded \$100,000 for the most recent 3-year period, and for wire-telegraph, ocean-cable and radiotelegraph carriers with average annual operating revenues exceeding \$50,000. Owing to the importance and scope of the telephone business handled by the Bell System, statistical data are given separately for that group of companies. Major intercompany duplications of financial data for the Bell System have been eliminated. In view of the fact that the reports filed by the smaller carriers contain less comprehensive information, only a limited amount of data are shown for that group in this volume.

Financial data from monthly reports.--Summary statistical data compiled from the monthly reports filed by common carriers are contained in this publication. Telephone carriers having annual operating revenues exceeding \$250,000, and wire-telegraph, ocean-cable and radiotelegraph carriers having annual operating revenues exceeding \$50,000 are required to file re-

ports with the Commission. Inasmuch as a large number of intrastate telephone carriers file on a monthly, but not on an annual basis, the cumulative monthly figures for telephone carriers are slightly higher than the figures shown for carriers, which only file annual reports.

Controlling companies.--The intercorporate relations among common carriers offering communication service, and the controlling companies, are shown in a table in this volume, together with financial data concerning individual holding companies. The annual reports filed by controlling companies are classified into two groups, as follows: (a) Companies whose interest in common carriers constitutes a major portion of their assets, and (b) companies whose interest in common carriers constitutes only a nominal portion of their assets.

Table 5.--Footnotes

* Represents carriers included in the Bell System.

/ Indicates carriers subject only to the provisions of secs. 201-205 of the Communications Act of 1934, which file reports for statistical purposes.

1/Telephone carriers filing annual reports are classified as follows: Class A carriers are those having average annual operating revenues exceeding \$100,000; class B carriers are those having average annual operating revenues exceeding \$50,000 but not more than \$100,000; class C carriers are those having average annual operating revenues exceeding \$25,000 but not more than \$50,000, and class D carriers are those having average annual operating revenues not exceeding \$25,000.

2/Carriers subject to the Communications Act of 1934 are required to file annual reports. Those carriers having annual operating revenues exceeding \$250,000 are also required to file monthly reports of revenues and expenses.

3/Radiotelephone carrier.

4/Merged with Associated Telephone Co., Ltd., as of April 1, 1948.

Source: Annual reports filed with the Interstate Commerce Commission through 1933 and with the Federal Communications Commission beginning with 1934. In a few instances data from unofficial sources or estimates were used.

Note.--The difference in the number of carriers reporting to the Commission in 1948 in comparison with prior years is caused by mergers, consolidations, reclassifications, etc.

Data for 1926-1943 include information for carriers reporting as class A in 1943. These data also cover properties acquired previous to 1943 by such carriers, insofar as data concerning such properties are available from annual reports. Carriers which reported as class A carriers for the years 1944-1948 but not in 1943 are reflected in the data for 1944-1948 only. Neither information for these companies nor for properties acquired by them previous to 1944 are included in the data for the years 1926-1943.

The effect of this change of definition is extremely slight. For example, the operating revenues of class A carriers reporting in 1948 not so characterized in 1943 were only 0.117 percent of total operating revenues reported.

^{1/} For amounts reflecting eliminations of intercompany duplications see table 7B.

^{2/} In comparing data in this table, consideration may be given to the minor effect of the revisions of the Uniform System of Accounts, effective January 1, 1933 and January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statement.

^{3/} The decrease reflected in data shown for the year 1933 is due mainly to the fact that prior to that year the total of wire jointly owned with other companies was included, whereas from 1933 on only the respondent's portion of jointly owned wire was included.

^{4/} Partly estimated.

^{5/} Data shown for years 1926-1932 include estimates

^{6/} Represents total compensation for the year divided by the number of employees.

^{7/} Represents the number of employees at end of October.

^{8/} Profits or losses on intercompany transfers of plant have not been eliminated.

Note: - Gross operating revenues and expenses are used in computing averages. They have been computed on the basis of 325 days to the year, which is the basis used by the Bureau of the Census in similar computations.

1/ Excludes figures for American Telephone & Telegraph Co. inasmuch as its operations are not confined to one geographical region, but are included in totals for the United States.

2/ American Telephone & Telegraph Co. handles long line service only; has no exchange central offices.

Source: Based on monthly reports of carriers to Interstate Commerce Commission and Federal Communications Commission. The centered 12 - month moving average was calculated monthly from July 1929 through September 1946, and the ratios of the toll service revenues to the moving average were calculated. The ratios for a given month in all years were graduated by means of a linear relation with time. Certain specific months were omitted in determining the relations because of unusual historic events, e.g. October 1929 (market crash), September 1939 (invasion of Poland), and the like. The seasonal factors applied are the graduated values. The monthly revenues were seasonally adjusted by dividing them by these seasonal factors.

1/ The intercompany duplications with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported aggregate par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of the combined surplus accounts of the carriers.

2/ "Bell System" represents the American Telephone and Telegraph Co. and its principal telephone subsidiaries.

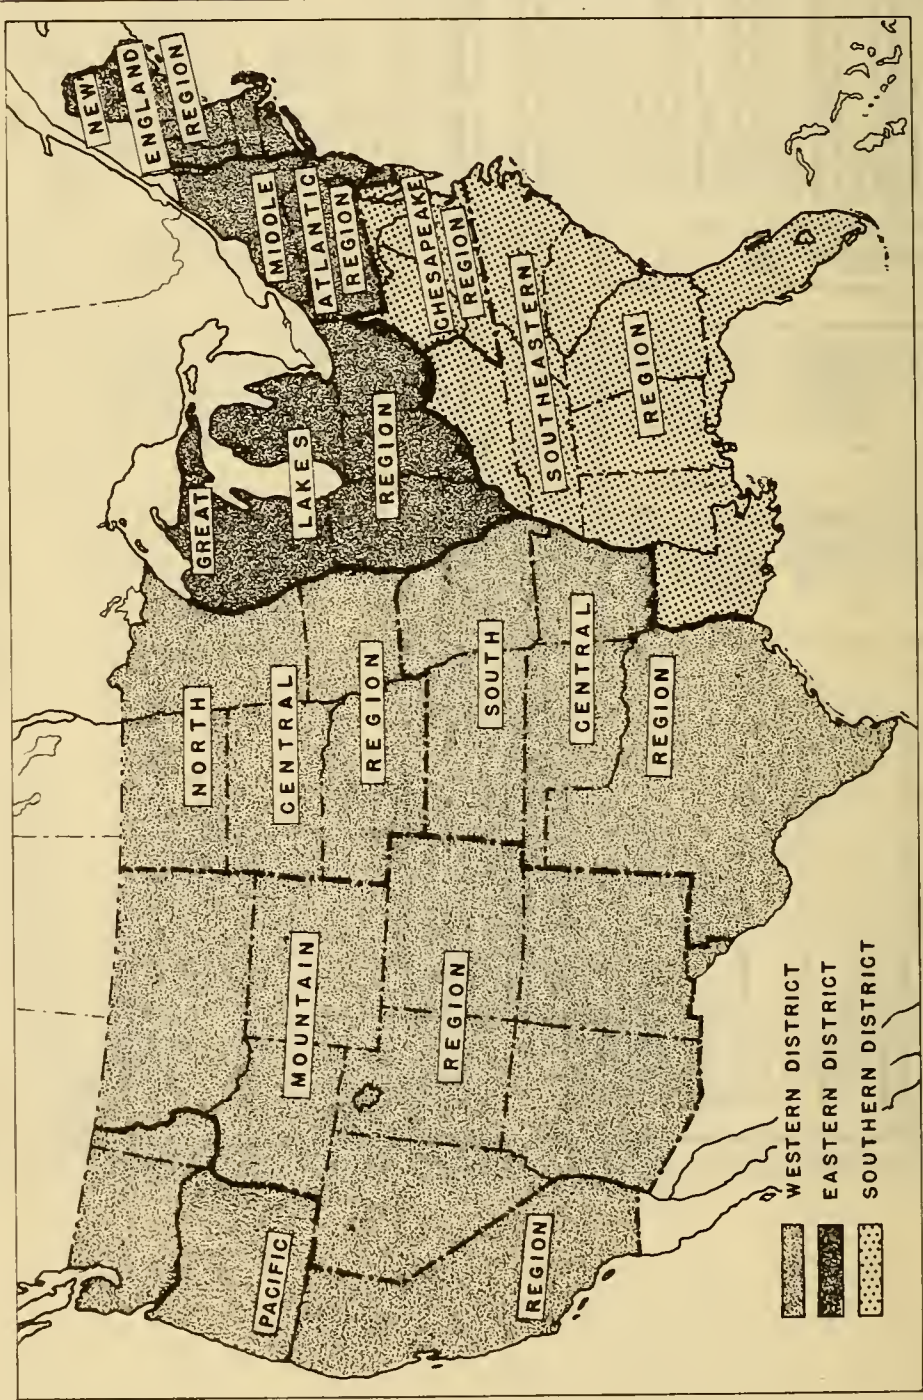

3/ To apply all rent revenues, approximately two-thirds of which are intercompany, against rent expenses, to show net rent expenses in first two columns of figure.

4/ Averages for all companies combined not computed.

5/ Partly estimated.

6/ Includes land-line charges. With respect to mobile service, monthly charges, and installation and move charges are included.

Source: Annual reports and correspondence.

() Deficit or other reverse item.

1/ Includes carriers consolidated or merged for which annual report data are available. Intercompany duplications have not been excluded.

2/ Reflects transfer of \$38,000,000 to depreciation reserve from surplus by Western Union Telegraph Co.

3/ In comparing data in this table with returns for prior years, consideration should be given to changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1943.

4/ Includes net book cost of plant of Postal Telegraph, Inc. acquired by the Western Union Telegraph Co. in the amount of \$16,754,143 on basis of gross book cost of \$69,320,179 less tentative allowances for depreciation of \$52,566,036.

5/ Not comparable with amounts reported for December 31, 1943 because of accounting adjustments for Postal Telegraph plant purchased by the Western Union Telegraph Co. October 7, 1943; comparable 1943 amounts are \$477,431,438 and \$221,701,458, for plant and depreciation allowance, respectively.

6/ Includes other long-term debt.

7/ Includes capital surplus.

8/ Represents operating income before deduction of income taxes.

9/ Includes \$3,535,926 charged to capital surplus.

10/ Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual count for test periods.

11/ Data shown for years 1926 to 1933, inclusive, include estimates by reporting carriers. The average shown represents total compensation for the year divided by the number of employees.

12/ Represents the number of employees at end of October.

() Deficit or other reverse item.

1/ Data not available.

2/ In comparing data in this table, consideration should be given to the effect of changes in reporting requirements due to the Uniform System of Accounts effective January 1, 1940.

3/ Includes other long-term debt beginning with the year 1940.

4/ Includes capital stock subscribed--unissued, amounting to \$282,500, \$182,500, and \$75,000 for the years 1946, 1947, and 1948 respectively.

5/ Includes capital surplus beginning with the year 1940.

6/ The increase was due principally to adjustments made by Mackay Radio and Telegraph Co. (California) and Mackay Radio and Telegraph Co. (Delaware) in connection with the reorganization of Postal Telegraph and Cable Corporation and The Associated Companies.

7/ Beginning with the year 1940, the figures shown are before deduction of income taxes.

8/ Includes \$3,600,000, \$300,000, and \$400,000 charged during the years 1933, 1934, and 1935 respectively, to surplus arising from reduction of capital stock.

9/ Includes \$150,000 and \$246,420 charged to capital surplus during the years 1940 and 1944, respectively.

10/ Includes data estimated by reporting carriers.

11/ Includes estimated data for the years 1926 to 1933, inclusive.

12/ Represents total compensation for the year divided by the number of employees.

13/ Represents the number of employees at end of October.

d/ Deficit or other reverse item.

1/ Includes certain corrections not appearing in figures shown in the monthly releases.

2/ Includes extraordinary income charges made during April 1945 amounting to \$1,206,039, resulting from an adverse decision of the Supreme Court with respect to The Western Union Telegraph Company's liability for the income taxes of two lesser companies, Gold and Stock Telegraph Co. and International Ocean Telegraph Co.

3/ Includes extraordinary adjustments made in December 1947, applicable to prior years of reserves for depreciation and uncollectible receivables (in the net amount of \$8,729,234). Apart from these adjustments the net income for the year 1947 amounted to \$9,141,346.

4/ Includes income from sale of land and building of Western Union Telegraph Co., 60 Hudson Street, New York, N. Y., during March 1948.

5/ Western Union Telegraph Co. accumulated as a deferred debit item during 1948, \$2,399,638 representing training costs incident to its modernization and improvement program. This item was charged to operating expenses in December 1948.

Source: Based on wire-telegraph transmission revenues reported monthly by Western Union and Postal Telegraph Companies to Interstate Commerce Commission and Federal Communications Commission. (Table 39-A) For the adjusted index, the average daily revenue was calculated monthly by dividing actual revenues by "number of business days". The "number of business days" in a month were computed by using the following weights: Monday through Friday, 100%; Saturdays, 50%; Sundays, 25%; holidays -- January 1, 50%; February 22, 50%; May 30, 25%; July 4, 25%; Labor Day, 25%; Thanksgiving, 50%; and December 25, 50%. If a holiday fell on Sunday, the following Monday was given the holiday weight. If a holiday fell on Saturday, the smaller percentage weight was used. The centered 12-month moving average of this daily average was calculated for each month from July 1929 through December 1948, and the ratios of the daily averages to the moving averages were calculated. The median of the ratios for a given month in all years was taken as the seasonal factor for that month, and the daily averages were seasonally adjusted by dividing them by these seasonal factors. The adjusted average daily revenues were expressed as percentages of their 1935-1939 average. (Table 39-B) The unadjusted indexes express transmission revenues as a percentage of their 1935-1939 average.

Note.--Principal telegraph, cable, and radiotelegraph carriers included herein are those having annual operating revenues exceeding \$50,000. Intercompany duplications have not been excluded.
() Deficit or other reverse items.

- 1/ Balance sheet figures with the exception of the plant and related reserves, are not segregated between the wire-telegraph and ocean-cable systems.
- 2/ No segregation of surplus between the wire-telegraph and ocean-cable systems of Western Union is reported so that the surplus in the column headed "Wire-telegraph--Western Union Telegraph Co." represents the combined surplus. As a result, the total liability side of the balance sheets for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, is \$16,334,227 less than the total asset side, the amount of the Western Union ocean-cable system net plant. Accordingly the same amount is included in the total liability side but excluded from the total asset side of the balance sheet for the Western Union wire-telegraph system. The net income of the ocean-cable system of \$356,460 has been added to the net income of the wire-telegraph system of \$1,264,578 to determine the balance sheet item of unappropriated surplus at the end of the year amounting to \$46,941,876.
The net income transferred to earned surplus for ocean-cable, and for ocean-cable and radiotelegraph carriers combined, includes the \$356,460 net income of the Western Union ocean-cable system, but it is not included in the unappropriated surplus at the end of the year.
- 3/ Includes estimated retroactive wage accruals amounting to \$4,911,725.
- 4/ Includes principally liability for tax collections and unpaid money orders.
- 5/ Includes capital stock subscribed - unissued, amounting to \$75,000.
- 6/ Operating revenue and operating expenses are both overstated by intrasystem rents paid between the land-line and ocean-cable systems of Western Union amounting to \$436,573.
- 7/ Represents rectifications, adjustments, etc.
- 8/ Includes message revenue adjustments amounting to \$64,512 (reverse item).
- 9/ Includes message revenue adjustments amounting to \$52,492 (reverse item).
- 10/ Represents nautical miles.
- 11/ Includes 24,264 nautical miles.
- 12/ Estimated on the basis of returns for the month of December, 1948.
- 13/ Includes territories and possessions of the United States except the Canal Zone.
- 14/ Represents principally data estimated by wire-telegraph and ocean-cable carriers on basis of actual count for test periods, and partially estimated by radiotelegraph carriers.
- 15/ International messages (primarily Canadian and Mexican) handled in accordance with carriers' rules governing domestic traffic are included under "Domestic service classification." Insular messages are included under "Foreign service classification."
- 16/ Includes domestic service classification - foreign traffic.
- 17/ Represents domestic service classification - foreign traffic.
- 18/ Message data already included under applicable service classification, and accordingly omitted from message totals to avoid duplication.
- 19/ Domestic haul of marine messages is included under "Domestic service classification."
- 20/ Data not available.
- 21/ Word data for "Domestic service classification" and "Domestic haul" are not available for wire-telegraph and ocean-cable carriers.
- 22/ Includes \$122,626 revenue for which the words and messages are not reported.

Table 51.--Intercompany relations of communication carriers and controlling companies, Dec. 31, 1948

Note.--Carriers controlled by other companies are indicated by indentation from the margin. For the purpose of this table, control is defined as the ownership of more than 50% of a carrier's voting common stock. Exceptions to this definition are noted in the "Remarks" column. Information shown is principally from annual and monthly reports filed with the Commission. In some instances data were obtained from unofficial sources.

INTRODUCTION

This section contains financial data concerning the operation of broadcast networks and AM, FM, and TV stations during the calendar year 1948. Financial data for the FM and TV broadcast services are included this year for the first time.

Part I, which deals with commercial AM broadcast stations and networks, covers the operations of 4 nation-wide networks, 3 regional networks and 1,824 AM broadcast stations. As of December 31, 1948, a total of 1,877 commercial AM stations were on the air.^{1/} An additional 215 AM stations were authorized and in the process of construction. AM licensees also operating FM stations were permitted to file "joint reports" covering the consolidated operation of both stations when separate accounts for each station were not maintained. For this reason, the financial statistics pertaining to AM stations and networks include data with respect to 440 FM stations operated by AM licensees. In virtually all such cases, the two stations were jointly-operated by the licensee, i.e., programs broadcast over the AM station were duplicated simultaneously by the FM station at no additional cost to the advertiser.

Part II summarizes the operation of (a) 142 FM stations (operated by AM licensees) for which separate FM reports were filed and (b) 89 FM stations operated by non-AM licensees.

Part III summarizes the operations of 4 TV networks and 50 TV stations for the year 1948.

^{1/} In addition, 35 AM stations operated non-commercially. Of these, 22 were licensed to educational institutions, 11 to religious groups and 2 to other non-profit organizations.

1/ Since the reports filed by the network key stations (i.e., stations originating most of the network's programs) do not contain adequate segregations of expenses between stations and network operations, financial data for networks and their key stations have been combined.

2/ Includes some nation-wide, regional and other network time sales reported by licensees of stations with total time sales of less than \$25,000.

3/ Since stations with time sales of less than \$25,000 for the year are not required to report details, this figure may include some amounts for national and regional non-network business.

4/ Of these amounts \$19,718,919 for 1947 and \$20,677,156 for 1948 is applicable to the sale of network time, columns 3 and 4, line 6, while the remainder and amounts shown in columns 9, 10, 15 and 16, line 14, are applicable to amounts reported on line 12, in respective columns.

1/ Does not include the operations of 11 key stations of nation-wide networks as the reports filed by them with the Commission do not include adequate segregations of expenses between station and network operations.

2/ Does not agree with region totals shown in state and region table as some of the metropolitan districts overlap two or more regions.

1/ Does not include the operations of eleven key stations of nation-wide networks, as the reports filed by them with the Commission do not include adequate segregation of expenses between station and network operations.

2/ Does not agree with region totals shown in State and Region table as some of the metropolitan districts overlap two or more regions.

TELEVISION FINANCIAL DATA

During 1948, the four TV networks and 50 stations (total on the air during the year) reported aggregate revenues of \$8.7 million, aggregate expenses of \$23.6 million and losses of almost \$15 million. All networks and stations reported a loss from operations during the year.

Of the \$8.7 million industry revenues, approximately \$2.5 million were derived from network programs with the remaining \$6.2 million sold directly by stations.

The distribution of total revenues, expenses and losses as between networks and stations was as follows:

	Revenues (millions)	Expenses (millions)	Loss (millions)
4 networks (including 10 owned and operated stations)	\$4.8	\$11.2	\$ 6.4
40 other stations	<u>3.9</u>	<u>12.4</u>	<u>8.5</u>
Industry Total	<u>\$8.7</u>	<u>\$23.6</u>	<u>\$14.9</u>

Exactly half of the stations operated six months or less with only 17 in operation during the entire year. Average monthly station revenues ranged from \$20,000 in the case of the "full year" stations to \$5,000 for stations in operation only two months or less.

With respect to operating costs of TV stations, the following data are based on 14 of the 17 stations in operation during the whole of 1948:

Aggregate Annual Operating Costs of 14 stations	\$7,532,000
Average per station	538,000
Average per month per station	45,000
Highest Annual Operating Expense	814,000
Lowest Annual Operating Expense	59,000 <u>1/</u>

1/ The wide range in annual operating costs reported during 1948 is accounted for, in large measure, by differences in the number of hours of station operation per week.

In several of the large cities, TV station revenues during 1948 constituted a relatively high proportion of the total revenues reported by all stations (both aural and visual) in those cities. In Philadelphia, TV revenues reported by 3 stations were almost 10 percent of the combined revenues of all broadcasting stations in that city. In New York and Washington, D. C., the proportion going to TV was approximately 8 percent, while in Baltimore and Milwaukee TV accounted for approximately 7 percent of the total revenues of all stations.

FM FINANCIAL DATA

Of the 700 commercial FM stations on the air as of December 31, 1948, 593 (or 85 percent) were authorized to licensees of standard broadcast (AM) stations and 107 (or 15 percent) to persons having no AM broadcast interests.

Financial reports filed by FM licensees for the year 1948 indicated that in the majority of cases where FM stations were authorized to AM licensees, the two stations were "jointly operated", i.e., programs broadcast over the AM stations were duplicated simultaneously by the FM station at no additional cost to the advertiser.

Thus, of the 593 AM licensees operating FM stations, only 77 reported separate revenues from their FM operation during 1948. A summary of the financial information reported for these 77 stations is as follows:

	<u>Aggregate</u>	<u>Average per Station</u>
Total broadcast revenues	\$621,469	\$8,070
Total broadcast expenses	2,153,659	27,970
Total broadcast loss	\$1,532,190	\$19,900

Of the 77 FM stations, 54 had been in operation for the full year of 1948. Total revenues of the full-year group averaged \$9,300 per station and average expenses about \$33,600. Thus, the average loss for stations operating the full 12 months was slightly over \$24,000. Of the 77 stations, four reported an income from FM operation during 1948.

Estimated FM station expense data were submitted by 65 of the 516 FM licensees who apparently engaged in a joint AM-FM operation during 1948. These reports indicated that FM station costs in an AM-FM joint operation averaged about \$15,000 during 1948.

The following table summarizes the 1948 financial information reported for 89 of the 107 FM stations operated by persons having no AM broadcast interests:

	<u>Aggregate</u>	<u>Average per Station</u>
Total broadcast revenues	\$1,126,208	\$12,650
Total broadcast expenses	4,182,558	46,990
Total broadcast loss	\$3,056,350	\$34,340

Of the 89 FM stations, 52 had been in operation for the full year of 1948. Total revenues of the full-year group averaged \$19,000, expenses \$53,300 with an average loss of \$34,300. All but three of the 89 reporting stations showed a loss from operations during 1948.
