DEPARTMENT OF COMMERCE,  
BUREAU OF NAVIGATION,  
*Washington, January 14, 1916.*

*To collectors of customs, radio inspectors, and others concerned:*

This publication is issued monthly by the Bureau of Navigation, Department of Commerce, and distributed to the United States officers engaged in or concerned with the enforcement of the radio laws for their guidance and instruction, and to those concerned with the operation of Government and commercial radio stations for their information.

The Radio Service Bulletin supersedes the quarterly supplements to the List of Radio Stations of the United States and contains information concerning Government, commercial, and special stations only. Information regarding amateur stations appears only in the annual edition of the List of Radio Stations of the United States.

The bulletin contains tables of new stations, alterations, and corrections under headings, so that the List of Radio Stations of the United States and the List of Radiotelegraph stations, published by the international bureau at Berne, may be brought up to date. Additions, alterations, and corrections should be entered in these two publications promptly on receipt of the bulletin.

Amendments to or changes in the Radio Laws and Regulations of the United States (edition of July 27, 1914) are printed in this bulletin in such a manner that they may be clipped and pasted in their proper places in that publication.

Items of general interest concerning the enforcement of the radio laws are printed in the bulletin from time to time, as occasion warrants.

E. T. CHAMBERLAIN,  
*Commissioner of Navigation.*

Approved:  
E. F. SWEET,  
*Acting Secretary.*

## LOS ANGELES AMATEURS REPORTED FOR VIOLATIONS.

During a recent visit of V. Ford Greaves, radio engineer of the Bureau, and Ellery W. Stone, assistant radio inspector at San Francisco, the following Los Angeles amateur radio stations were found to be operating in violation of the radio act, and the cases have been referred to the United States district attorney for prosecution:

Hadys Hancock, Venice Pier, Venice, Cal., was found to be using a wave length in excess of 200 meters; maximum penalty, \$100.

Richard White, 435 Oakland Avenue, Pasadena, Cal., operating an amateur station without a license and using improper call letters; maximum penalty, \$100 fine and imprisonment for not more than two months.

Ernest Underwood, 903 Commercial Street., Inglewood, Cal., using a wave length in excess of 200 meters; maximum penalty, \$100.

George Vodra, 211 South Avenue, Los Angeles, Cal., using an amateur sending station without either station or operator's license; maximum penalty, \$100 and imprisonment for not more than two months.

Stuart Dalton, 121 East Twenty-third Street, Los Angeles, Cal., using a wave length exceeding 200 meters; penalty, \$100.

Harry Blodgett, 1953 Bonsallo Avenue, Los Angeles, Cal., using a transmitting station for some time without station or operator's license; maximum penalty, \$100 fine and imprisonment for two months.

## METHOD OF CORRECTING LIST OF RADIO STATIONS OF THE UNITED STATES.

The following method of keeping the List of Radio Stations of the United States up to date by means of the Radio Service Bulletin is published for the information and guidance of those concerned:

The blank pages provided at the back of the List of Radio Stations should be numbered from 1 to 24.

The list of new stations published in the Radio Service Bulletin should be cut out and pasted on one of these blank pages.

The names and call letters of new stations should then be written on the margin of the proper page in the main list, with an arrow indi-

ating the proper alphabetical position. Following the name and call letter should be written the number of the page at the back of the book on which the particulars regarding the new station appear. This constitutes an alphabetical index to new stations.

The names of new stations should be written in the main list under the heading "Land and ship stations, alphabetically by call signals," showing the proper call signals as published in the bulletin. All of the call signals allotted to the United States are published in the list and followed by blanks for this purpose.

As there is not space in the main list in which to write changes concerning particulars of stations, the tables of alterations and corrections published in the bulletin should be cut and pasted on the blank pages provided at the back of the List of Radio Stations in such a manner as to permit the reading of both sides of a sheet thus inserted. Following the name of the station in the List of Radio Stations, the particulars of which have been altered, should be written the number of the page in the back of the book on which the changes may be found. Where the alterations and corrections affect only the Berne list the reference note may be omitted. The names of stations which have been discontinued or dismantled should be crossed out on the main list.

Corrections or changes in call letters should be written in the List of Radio Stations under the proper heading.

#### AMENDMENTS.

The Radio Laws and Regulations of the United States, edition of July 27, 1914, are hereby amended as follows:

Page 66, paragraph 149, should read:

Amateurs should write to the nearest examining officer in their vicinity (see pars. 134-145) for Form 756 "Application for operator's license," and to the radio inspector in their vicinity for Form 762 "Amateur applicant's description of apparatus."

Foreign-born applicants for station licenses must submit satisfactory evidence of their citizenship.

Page 67, paragraph 156, add the following sentence:

Licenses will not be signed by examining officers until the oath of secrecy has been properly executed.

Page 67, paragraph 160, last sentence should read:

Licenses held by them must be submitted to the examining officer.

Page 67, paragraph 161, should read:

Radio operators who pass the examination for a higher-grade license are required to submit their existing licenses to examining officers to be marked "Canceled."

Page 67, paragraph 162, should read:

Expired or canceled licenses will be returned to the licensees, marked "Canceled" or "Expired" in red across their faces, provided the particulars on Form 756, submitted herewith, are found correct by the examining officer. The service record shown on the reverse side of the license must be transcribed on Form 756.

Page 70, paragraph 175, should read:

Whenever practicable, the radio inspector shall satisfy himself on his visit before the departure of a steamer subject to the act of June 24, 1910, as amended July 23, 1912, that the radio apparatus is efficient and in good working order within the meaning of the act. If the apparatus does not comply with the law, the radio inspector will furnish the master with the stub of Form 771 "inspection record" on which will be noted the particulars in which the apparatus does not comply with the law. Where apparatus is found to be in compliance with the law, the stub of Form 771 will not be detached.

Page 70, paragraph 176, should read:

Masters of vessels entering a port of the United States and expecting to leave under the act of June 24, 1910, as amended July 23, 1912, should file Form 753a "Radio declaration" (Appendix A) in duplicate with the customs officer at the time of entry. The customs officer will furnish one copy to the radio inspector in order that proper inspection of the radio equipment may be made before departure.

Page 70, paragraph 177, should read:

For each departure of a steamer under the act of June 24, 1910, as amended July 23, 1912, the master is required to furnish to the customs officer a certificate in the form of Appendix B (Form 753b) "Master's certificate of radio apparatus." Such certificates shall be retained in the files of the collectors of customs. The collector of customs will arrange for the collection of these certificates at all times.
