

RADIO INDEX

Published for

Crowley, Milner & Co.

THE BROADCASTING STATIONS OF AMERICA
arranged in order of their 1925 wave length, frequency,
call letters, location, and dial readings, with the class,
power, owner and mail address of each station.

A COMPLETE RADIO INDEX

Index by Call Letters In this grouping all the stations are listed alphabetically by call letters. Enter your dial readings in spaces provided and you have instant reference thereafter when a particular station is desired. Note the complete data for each station and the large, readable type. No hunting for the information you want. **Pages 2 to 27**

Index by Location Here the stations are listed again alphabetically by states and cities. The wave lengths are given so that those tantalizing stations may be identified where the name of city is heard but the call letters are not caught. Your dial readings give you the approximate wave length and this index does the rest. **Pages 28 to 33**

Index by Wave Lengths The stations are here given numerically by wave length and frequency. Wave lengths read down and frequencies read up. Opposite each wave length spaces are provided for dial readings. Entering dial numbers here calibrates your set, gives you an index by dial readings and tells you where to set your dials for new stations or those you have never heard. **Pages 34 to 40**

*An Absolute Essential to the Intelligent
Operation of a Receiving Set.*

THE RADEX PRESS

206 Euclid Arcade Annex

Cleveland, Ohio

RADIO INDEX

All the Broadcasting Stations of the United States, Canada, Mexico and Cuba in a single list.

Stations indexed by dial readings, wave lengths, locations, frequencies and call letters.

Immediately identifies stations where city is known but call letters are indistinct.

Instant reference to dial numbers for any station once heard.

Dial positions for stations never heard.

Automatically calibrates your set.

Price 50 Cents
