# SUPER-POWER AND COURTS MAY SOLVE BROADCAST CONGESTION

By THOMAS STEVENSON

---

Seventy-six new stations are expected on the air within the next two months—that is, 76 are now under construction and will be ready for operation by January 1. Furthermore, plans are progressing for the construction of 110 additional broadcasters.

With conditions as bad as they are, it is hard to imagine where the new broadcasters will find wave lengths upon which they can operate without serious interference to themselves and others. In the absence of regulations, it is their privilege to attempt it.

It begins to be apparent how established stations will fight the newcomers. It will be in the Courts and with super-power.

During the last month or two a number of stations have more than doubled their power. As examples, KFAB has gone from 1,000 to 5,000 watts; KGO from 5,000 to 20,000 watts; KMOX from 1,000 to 5,000 watts; WAHG from 500 to 5,000; WBAP from 1,500 to 10,000 watts, etc.

It is a safe prediction that these high-power broadcasters will not be comfortable bed-fellows and that newcomers will be most likely to select other wave lengths for their stations.

A test case on the priority right of stations to operate without suffering from interference caused by poachers is now pending in the Chicago Courts and undoubtedly will be decided within a few days. Legal authorities cannot but believe that the Courts will decide in favor of the established station. That is, the station first on the ground will have the right to use its wave length without interference locally. Whether the plan can be extended to a national basis is uncertain. There is no question that it will be attempted.

Meantime, Congressional advocates of radio legislation continue to quibble about details such as who is to regulate broadcasting; the number of commissioners, the amount of their salaries, their religious beliefs, etc.

To put it in the words of Hon. Wallace White, author of the White radio bill, "Congress is fiddling while Rome burns—if Rome is not already destroyed."

## LIST OF STATIONS BY WAVE LENGTHS

It is unusual with most sets to pick up distant stations of less than 100 watts power. To prevent this list from becoming too bulky, stations of less than 100 watts are not included.

# Earn \$50 to \$200 a Week in RADIO

You can! Hundreds of ambitious men are already earning thousands of dollars in this wonderful new industry—you, too, can get your share. Mail coupon below for Free Book which describes fully the amazing money-making opportunities in Radio and tells you how YOU can earn from \$5,000 to over \$10,000 a year.

**T**HE astounding growth of Radio has created thousands of big money opportunities. Millions of dollars were spent during the past year on Radio, and thousands of young men are needed right now to meet the ever-increasing demand of work.

Men are needed to build, sell and install Radio sets—to design, test, repair—as Radio engineers and executives—as operators at land stations and on ships traveling the world over—as operators at the hundreds of broadcasting stations. And these are just a few of the wonderful opportunities.

## Easy to Learn Radio at Home in Spare Time

No matter if you know nothing about Radio now, you can quickly become a Radio expert, by our marvelous new method of practical instruction—instruction which includes all the material for building the latest up-to-date Receiving Sets.

Scores of young men who have taken our course are already earning from \$75 to \$200 a week. Emmet Welch, right after finishing his training, started earning \$300 a month and expenses. Still another graduate, only 26 years old, is averaging \$70 a week in a Radio store.

### Doubles Salary

I can very easily make double the amount of money now than before I enrolled with you. Your course has benefited me approximately \$3,000 over and above what I would have earned had I not taken it.

### From \$15 to \$80 a Week

Before I enrolled with you I was making \$15 a week on a farm. Now I earn from \$2,050 to \$4,420 a year, and the work is a hundred times easier than before. Since graduating a little over a year ago, I have earned almost \$4,000, and I believe the course will be worth at least \$100,000 to me.

(Signed) **GEO. A. ADAMS,**  
Tamaqua, Pa.

## Wonderful Opportunities

Hardly a day goes by without our receiving urgent calls for our graduates.

Take advantage of our practical training and the unusual conditions in Radio to step into a big paying position in this wonderful new field. Radio offers you more money than you probably ever dreamed possible—fascinating, easy work—a chance to travel and see the world if you care to, or to take any one of the many Radio positions all around you at home. And Radio offers you a glorious future!
