8-20

A blast! The most! The end!
Our CB BAND BUSTER
puts out talk power like groovy!

Voice-boosting, impedance-matching gizmo
slips cosily inside your living mike!

- Build a 3-buck battery renovator
- Visit an honest-to-goodness ham mini-expo
- See a \$10-million bubble bath
- Discover our magnetic audio generator

EICO Makes It Possible

Uncompromising engineering — for value does it!
You save up to 50% with Eico Kits and Wired Equipment.

Cortina Stereo

THE VERDICT IS IN. High fidelity authorities agree: Cortina's engineering excellence, 100% capability, and compact dramatic esthetics all add up to Total Stereo Performance at lowest cost.

NEW A Silicon Solid-State 70-Watt Stereo Amplifier for \$99.95 kit, \$139.95 wired, including cabinet. Cortina 3070

NEW A Solid-State FM Stereo Tuner for \$99.95 kit, \$139.95 wired, including cabinet. Cortina 3200.

A 70-Watt Solid-State FM Stereo Receiver for \$169.95 kit, \$259.95 wired, including cabinet. Cortina 3570.

NEW Silicon Solid State 150-Watt Stereo Amplifier designed for audio perfectionists. Less than 0.1% harmonic distortion, IM distortion. Less than 0.6% at full output. Controls and inputs for every music source. \$149.95 kit, \$225.00 wired including cabinet. Cortina 3150.

NEW 70-Watt Solid State AM/FM Stereo Receiver for \$189.95 kit, \$279.95 wired including cabinet. Cortina 3770.

Eicocraft

The newest excitement in kits. 100% solid-state and professional.

Fun to build and use. Expandable, interconnectable. Great as "jiffy" projects and as introductions to electronics. No technical experience needed. Finest parts, pre-drilled etched printed circuit boards, step-by-step instructions.

- EC-100 Electronic Siren \$4.95, EC-101 Electronic Burglar Alarm \$6.95,
- EC-102 Electronic Fire Alarm \$6.95, EC-200 Electronic Intercom \$5.95
- EC-300 Audio Power Amplifier \$5.95, EC-400 Electronic Metronome \$3.95,
- EC-500 Tremolo \$9.95, EC-600 Electronic Light Flasher \$3.95,
- EC-700 Electronic "Mystifier" \$4.95, EC-800 Photo Cell Nite Lite \$4.95,
- EC-900 Power Supply \$8.95, EC-1000 Code Oscillator \$2.50,
- EC-1100 FM Wireless Mike \$9.95, EC-1200 AM Wireless Mike \$9.95,
- EC-1300 Electronic VOX \$8.95, EC-1400 Solid State FM Radio \$9.95,
- EC-1500 Solid State AM Radio \$8.95, EC-1600 Electronic Bongos \$7.95

6 EXCITING NEW PROJECTS

- EC-1700 Ham/CB Vox \$8.95,
- EC-1800 Electronic "TOX" \$8.95,
- EC-1900 "Treasure Finder" \$9.95,
- EC-2000 Electronic Organ \$9.95,
- EC-2100 Electronic "Eye" \$9.95,
- EC-2200 Electronic Touch Switch \$8.95

Color n' Sound

Add a new dimension to your music enjoyment. Introducing the first inexpensive solid-state electronic system which provides true synchronization of color with sound. Watch the music you love spring to life as a vibrant, ever shifting interplay of colors.

Simply connect to speaker leads of your Hi-Fi system (or radio). Kit can be assembled in several hours — no technical knowledge or experience necessary. Kit \$49.95, Wired \$79.95.

Model 232 Peak-to-Peak VTVM. A must for color or B&W TV and industrial use. 7 non-skip ranges on all 4 functions. With exclusive Uni-Probe. \$34.95 kit, \$49.95 wired.

Automotive

EICO 888—Car/Boat Engine Analyzer.
For all 6V/12V systems; 4, 6, 8-cyl. engines.

Now you can keep your car or boat engine in tip-top shape with this solid-state, portable, self-powered universal engine analyzer. Completely tests your total ignition/electrical system.

Complete with a Tune-up & Trouble-shooting Manual. Model 888; \$49.95 kit, \$69.95 wired.

Test Equipment

100 best buys to choose from.

"The Professionals"
— laboratory precision at lowest cost.
Model 460 Wideband Direct-Coupled 5" Oscilloscope. DC-4.5mc for color and B&W TV service and lab use. Push-pull DC vertical amp., bal. or unbal. input. Automatic sync limiter and amp. \$99.95 kit, \$149.95 wired.

Training

is part of the Grantham

A. S. E. E.

DEGREE CURRICULUM

In today's world of electronics employment, an FCC license is important — sometimes essential — but it's not enough! Without further education, you can't make it to the top. Get your FCC license without fail, but don't stop there. To prepare for the best jobs, continue your electronics education and get your Associate Degree in Electronics.

This is good common sense for those who want to make more money in electronics. It also makes sense to prepare for your FCC license with the School that gives degree credit for your license training — and with the School that can then take you from the FCC license level to the Degree level.

The first two semesters of the Grantham degree curriculum prepare you for the first class FCC license and radar endorsement. These two semesters, in addition to other parts of the Grantham

This booklet
FREE!

This free booklet explains what an FCC license and ASEE degree can do for your future.

degree curriculum, are available by correspondence* at very reasonable tuition. *The ASEE Degree can be earned by correspondence with a minimum of one semester in residence.*

Accreditation, and G.I. Bill Approval

Grantham School of Electronics is *accredited* by the Accrediting Commission of the National Home Study Council, and is *approved* for both correspondence and resident training under the G.I. Bill. Mail the coupon, or simply write or telephone for your free copy of our Associate Degree Bulletin which gives complete details of our educational program.

GRANTHAM School of Electronics

*Semesters 1, 2, and 3 of the Grantham electronics curriculum are available *also in resident classes* at our Washington, D.C. school — at the address shown below.

• Established in 1951 •

Grantham School of Electronics

WHITE'S RADIO LOG

Volume 50, Part 2

An up-to-date Broadcasting Directory of North American AM, FM and TV Stations. Including a Special Section on World-Wide Shortwave Stations

This is the second part of *White's Radio Log*, published in three parts twice each year. This format permits the Editors of RADIO-TV EXPERIMENTER to offer its readers two complete volumes of *White's Radio Log* each year, while increasing the scope of the *Log* and inserting station changes as they occur.

In this issue of *White's Radio Log* we have included the following listings: U. S. AM Stations by Location, U. S. FM Stations by States, Canadian AM Stations by Location, Canadian FM Stations by Location, and the expanded, up-to-date World-Wide Shortwave Section.

In the Dec. 1968-Jan. 1969 issue of RADIO-TV EXPERIMENTER, the *Log* will contain the following listings: U. S. AM Stations by Call

Letters, U. S. FM Stations by Call Letters, Canadian AM Stations by Call Letters, Canadian FM Stations by Call Letters, and the expanded World-Wide Shortwave Section.

In the event you missed any part of the *Log* published earlier this year, you will have a complete copy of *White's Radio Log* by collecting any three consecutive issues of RADIO-TV EXPERIMENTER during 1968. The three consecutive issues comprise a complete volume of *White's Radio Log* that offers complete listings with last minute station change data that cannot be offered in any other magazine or book. If you are a broadcast band DXer, FM station logger, like to photograph distant TV test patterns, or tune the shortwave bands, you will find *White's Radio Log* an unbeatable reference.

WHITE'S QUICK REFERENCE INDEX

U. S. AM Stations by Location	94

A THANK YOU NOTE FROM THE EDITORS

Thank you! The Editors of R-TV EXPERIMENTER would like to thank all readers who offered information on station changes, additions and deletions during the past few months. Though many of the letters overlapped, each aided us considerably in making the task of keeping White's Radio Log as current as possible at press time. If we left your name out, please forgive us!

Dan Adams, San Jose, Calif.
 Stephen Albert, Newton, Mass.
 Lloyd Andrew, Manassas, Va.
 William Bussiere, Chicago, Ill.
 Don Davis, Albuquerque, N.M.

World-Wide Shortwave Stations

■ It's quiz time again, gang! Lots of sweat and tears and for no prizes; just a test of your equipment and tuning abilities. How well can you do? Scoring instructions at the end.

1. Revolution anybody? You can tune in on the on-again, off-again Haitian revolt by listening to the clandestine broadcaster *La Voix de l'Union Haitienne Internationale* at 1100 GMT on 15260 kHz.

2. *Radio Aparaceida*, 9635 kHz, in Brazil, is looking for tape recordings of their signals. If you send them a 5 minute recording of someone speaking over their transmitter they'll send you a special diploma. Enclose four International Reply Coupons, you'll get the diploma via airmail. Their address is *Radio Aparaceida*, Praca NS, Aparaceida 315, Brazil.

3. A genuine rare country, the Maldive Islands. Listen for the *Maldive Islands Broadcasting Service* on 9552 kHz at 0700 to 0930 GMT.

4. Not a rare country, but a rarely monitored station is XEJN in Huayacocotle, Vera Cruz, Mexico. They announce *Sistema Educativa* on 2390 kHz around 0215 GMT and then give school lessons. Can you hear them? (Turn page)

 Al Underhill, Schenectady, N.Y.
 Richard Curtis, Woburn, Mass.

5. There are scads of foreign aeronautical communications stations on 8956 kHz. How many ground stations can you log in a 30 minute period tonight?

6. Estonia is one of the tiny Baltic nations which was swallowed up by the USSR some years ago. Seldom heard on the air, you might be able to log *Eesti Raadio Tallin* on 6085 kHz someday around 2000 GMT. Wanna try?

7. A new frequency for *Radio Japan!* Can you log them on 21640 kHz during their 0215 GMT transmission?

8. The frequency of 8243 kHz is an old favorite of passenger steamships when they want to place ship-to-shore calls from the high seas. How many can you log here in a one hour period?

9. The *Council of Churches* in Jawa,

Indonesia, has started a new station on 4087 kHz. It broadcasts at 0730, 1500, and 1930 GMT. It's not easy to hear in the U. S.

10. One of the last of the old time low frequency police stations is KCA999 of the New Hampshire State Police in Concord. They are heard across the country when conditions are right on 1682 kHz. Or you can try for Elko, Nev. cops on 1634 kHz—they're the lowest on the air. Don't cop out! Try for this one.

Scoring. You get 10 points each for numbers 1, 2, 3, 4, 6, 7, 9, and 10. One point for each station in numbers 5 and 8. If you score 20 or below, try harder; 21 to 40, you show promise; 41 to 60, nice going; 61 to 80, you must be doing something right; 81 to 90, we're proud of you; above 91, nobody likes a showoff!

Need A Lab Scope?

Continued from page 53

100 μ s/cm. One complete cycle occupies 3.3 cm. Thus, $f = 1/3.3 \times 100 \mu$ s or 3.03 kHz (this figure is within scope's 5% accuracy rating).

With a calibrated scope the operator can instantly determine the frequency of the vertical input signal. And with the triggered sweep, he obtains instant synchronization for any signal within the scope's range.

Vertical Attenuator. The calibrated vertical input is another feature of the lab scope. Fig. 7 shows the Heath IO-14's input controls. These are typical of lab scopes.

Fig. 7. Vertical amplifier is calibrated for volts/cm when gain control is in CAL. position.

Note that the input is calibrated directly in volts/cm. The normal position for the gain control is the calibrated position, though it can be adjusted for a relative gain if desired. There is no guesswork or need for an external calibrator when the gain control is set to the calibrated position.

Two last traces (in box) show how the calibrated vertical input is used. In the first, an input signal is fed into the scope and the vertical attenuator is set for a trace of convenient size.

Looking at the attenuator we find it is set for 1 V/cm. Counting graticule units, we see that the trace occupies 2.8 cm between its peak positive and negative values. The input voltage is therefore 1 V/cm \times 2.8 or 2.8 V P-P.

Space occupied by trace indicates amplitude of signal.

Calibrated input of Data Instruments 555 scope. Lab check of unit appears on page 69!

The last trace shows a more typical application. One of our staff members built a scope calibrator and wanted it checked out. The calibrator was supposed to have a 1 V P-P output. With the IO-14's vertical attenuator set to 0.5 V/cm, we obtained a trace exactly 2 cm high. The input voltage was therefore 0.5 V/cm \times 2 or 1 V P-P—right on the button.

Of course, this is only part of the story. There are many features of more complicated lab scopes which cannot be discussed briefly. A quick look at the catalogs of manufacturers like Tektronix and Hewlett-Packard will reveal whole lines of professional scopes and plug-in accessories which go way beyond the basic features discussed here.

Plug-in amplifiers are available that measure frequencies in the uhf range, or even higher. All sorts of precision time bases can be plugged in, and there are even scopes that display two signals simultaneously.

However, most of us don't need a control room equipped like the ones at Cape Kennedy. Any lab scope you choose to replace your service-grade model is sure to provide convenience and excitement enough. ■

A Government FCC License can help you bring home up to \$10,000, \$12,000, and more a year. Read how you can prepare for the license exam at home in your spare time – with a passing grade assured or your money back.

IF YOU'RE OUT TO BAG A BETTER JOB in Electronics, you'd better have a Government FCC License. For you'll need it to track down the choicest, best-paying jobs that this booming field has to offer.

Right now there are 80,000 new openings every year for electronics specialists—jobs paying up to \$5, \$6, even \$7 an hour...\$200, \$225, \$250 a week...\$10,000, \$12,000, and up a year! You don't need a college education to make this kind of money in Electronics. You don't even need a high school diploma.

But you *do* need knowledge, knowledge of electronics fundamentals. And there is only one nationally accepted method of measuring this knowledge...the licensing program of the FCC (Federal Communications Commission).

Why a license is important

An FCC License is a legal requirement if you want to become a Broadcast Engineer, or get into servicing any other kind of transmitting equipment—two-way mobile radios, microwave relay links, radar, etc. And even when it's not legally required, a license proves to the world that you understand the principles involved in *any* electronic device. Thus, an FCC "ticket" can open the doors to thousands of exciting, high-paying jobs in communications, radio and broadcasting, the aerospace program, industrial automation, and many other areas.

So why doesn't everybody who wants a good job in Electronics get an FCC License and start cleaning up?

The answer: it's not that simple. The government's licensing exam is tough. In fact, an average of two out of every three men who take the FCC exam fail.

There is one way, however, of being pretty certain that you will pass the FCC exam. And that is to take one of the FCC home study courses offered by Cleveland Institute of Electronics.

CIE courses are so effective that better than 9 out of 10 CIE graduates who take the exam pass it. That's why we can afford to back our courses with this iron-clad Warranty: Upon completing one of our FCC courses, you

must be able to pass the FCC exam and get your license—or you'll get your money back!

They got their licenses and went on to better jobs

The value of CIE training has been demonstrated time and again by the achievements of our thousands of successful students and graduates.

Ed Dulaney, Scottsbluff, Nebraska, for example, passed his 1st Class FCC License exam soon after completing his CIE training...and today is the proud owner of his own mobile radio sales and service business. "Now I manufacture my own two-way equipment," he writes, "with dealers who sell it in seven different states, and have seven full-time employees on my payroll."

Daniel J. Smithwick started his CIE training while in the service, and passed his 2nd Class exam soon after his discharge. Four months later, he reports, "I was promoted to manager of Bell Telephone at La Moure, N. D. This was a very fast promotion and a great deal of the credit goes to CIE."

Eugene Frost, Columbus, Ohio, was stuck in low-paying TV repair work before enrolling with CIE and earning his FCC License. Today, he's an inspector of major electronic systems for North American Aviation.

"I'm working 8 hours a week less than before," says Mr. Frost, "and earning \$228 a month more."

Send for FREE book

If you'd like to succeed like these men, send for our FREE 24-page book "How To Get A Commercial FCC License." It tells you all about the FCC License...requirements for getting one...types of licenses available...how the exams are organized and what kinds of questions are asked... where and when the exams are held, and more.

With it you will also receive a second FREE book, "How To Succeed In Electronics." To get both books without cost or obligation, just mail the attached postpaid card. Or, if the card is missing, send your name and address to CIE at the address below.

ENROLL UNDER NEW G.I. BILL. All CIE courses are available under the new G.I. Bill. If you served on active duty since Jan. 31, 1955, or are in service now, check box on reply card for complete details.

BUILD YOUR OWN RADIO

CIRCUITS AT HOME
with the New Improved
PROGRESSIVE RADIO "EDU-KIT"

only

\$26.95

A Practical Home Radio Course

Now Includes

- ★ 12 RECEIVERS
- ★ 3 TRANSMITTERS
- ★ SQ. WAVE GENERATOR
- ★ SIGNAL TRACER
- ★ AMPLIFIER
- ★ SIGNAL INJECTOR
- ★ CODE OSCILLATOR

EXPANDED "EDU-KIT" NOW INCLUDES

- ★ TRANSISTOR (Solid State) CIRCUITS
- ★ VACUUM TUBE CIRCUITS
- ★ PRINTED CIRCUITS
- ★ HAND WIRED CIRCUITS

Reg. U. S. Pat. Off.

Training Electronics Technicians Since 1946

FREE EXTRAS

• SET OF TOOLS

- SOLDERING IRON
- ELECTRONICS TESTER
- PLIERS-CUTTERS
- WALLABLE DISCOUNT CARD
- CERTIFICATE OF MERIT
- TESTER INSTRUCTION MANUAL
- HIGH FIDELITY GUIDE + QUIZZES
- TELEVISION BOOK + RADIO TROUBLE-SHOOTING BOOK
- MEMBERSHIP IN RADIO-TV CLUB: CONSULTATION SERVICE + FCC AMATEUR LICENSE TRAINING
- PRINTED CIRCUITRY

YOU DON'T HAVE TO SPEND HUNDREDS OF DOLLARS FOR A RADIO COURSE

The "Edu-Kit" offers you an outstanding PRACTICAL HOME RADIO COURSE at a rock-bottom price. It is designed to train Radio & Electronics Technicians, making use of the most modern methods of home training. You will learn radio theory, construction practice and servicing. THIS IS A COMPLETE RADIO COURSE IN EVERY DETAIL. You will learn how to build radios, using regular schematics; how to wire and solder in a professional manner; how to service radios. You will work with the standard type of punched metal chassis as well as the latest development of Printed Circuit chassis.

You will learn the basic principles of radio. You will construct, study and work with RF and AF amplifiers and oscillators, detectors, rectifiers, test equipment. You will learn and practice code, using the Progressive Code Oscillator. You will learn and practice trouble-shooting, using the Progressive Signal Tracer, Progressive Signal Injector, Progressive Dynamic Radio & Electronics Tester, Square Wave Generator and the accompanying instructional material.

You will receive training for the Novice, Technician and General Classes of F.C.C. Radio Amateur Licenses. You will build Receiver, Transmitter, Square Wave Generator, Code Oscillator, Signal Tracer and Signal Injector circuits, and learn how to operate them. You will receive excellent background in television, Hi-Fi and Electronics.

Absolutely no previous knowledge of radio or science is required. The "Edu-Kit" is the product of many years of teaching and engineering experience. The "Edu-Kit" will provide you with a basic education in Electronics and Radio, worth many times the low price you pay. The Signal Tracer alone is worth more than the price of the kit.

THE KIT FOR EVERYONE

You do not need the slightest background in radio or science. Whether you are interested in Radio & Electronics because you want an interesting hobby, a well paying business or a job with a future, you will find the "Edu-Kit" a worth-while investment. Many thousands of individuals of all

ages and backgrounds have successfully used the "Edu-Kit" in more than 79 countries of the world. The "Edu-Kit" has been carefully designed, step by step, so that you cannot make a mistake. The "Edu-Kit" allows you to teach yourself at your own rate. No instructor is necessary.

PROGRESSIVE TEACHING METHOD

The Progressive Radio "Edu-Kit" is the foremost educational radio kit in the world, and is universally accepted as the standard in the field of electronics training. The "Edu-Kit" uses the modern educational principle of "Learn by Doing." Therefore you construct, learn schematics, study theory, practice trouble shooting—all in a closely integrated program designed to provide an easily-learned, thorough and interesting background in radio.

You begin by examining the various radio parts of the "Edu-Kit." You then learn the function, theory and wiring of these parts. Then you build a simple radio. With this first set you will enjoy listening to regular broadcast stations, learn theory, practice testing and trouble-shooting. Then you build a more advanced radio, learn more advanced theory and techniques. Gradually, in a progressive manner, and at your own rate, you will find yourself constructing more advanced multi-tube radio circuits, and doing work like a professional Radio Technician.

Included in the "Edu-Kit" course are Receiver, Transmitter, Code Oscillator, Signal Tracer, Square Wave Generator and Signal Injector Circuits. These are not unprofessional "breadboard" experiments, but genuine radio circuits, constructed by means of professional wiring and soldering on metal chassis, plus the new method of radio construction known as "Printed Circuitry." These circuits operate on your regular AC or DC house current.

THE "EDU-KIT" IS COMPLETE

You will receive all parts and instructions necessary to build twenty different radio and electronics circuits, each guaranteed to operate. Our Kits contain tubes, tube sockets, variable, electrolytic, mica, ceramic and paper dielectric condensers, resistors, tie strips, hardware, tubing, punched metal chassis, Instruction Manuals, hook-up wire, solder, selenium rectifiers, coils, volume controls and switches, etc.

In addition, you receive Printed Circuit materials, including Printed Circuit chassis, special tube sockets, hardware and instructions. You also receive a useful set of tools, a professional electric soldering iron, and a self-powered Dynamic Radio and Electronics Tester. The "Edu-Kit" also includes Code Instructions and the Progressive Code Oscillator, in addition to F.C.C. Radio Amateur License training. You will also receive lessons for servicing with the Progressive Signal Tracer and the Progressive Signal Injector, a High Fidelity Guide and a Quiz Book. You receive Membership in Radio-TV Club, Free Consultation Service, Certificate of Merit and Discount Privileges. You receive all parts, tools, instructions, etc. Everything is yours to keep.

Progressive "Edu-Kits" Inc., 1186 Broadway, Dept. 550NN, Hewlett, N. Y. 11557

—UNCONDITIONAL MONEY-BACK GUARANTEE—

Please rush my Progressive Radio "Edu-Kit" to me, as indicated below:

Check one box to indicate choice of model

- Regular model \$26.95.
 - Deluxe model \$31.95 (same as regular model, except with superior parts and tools).
 - Expanded model \$36.95 (same as Deluxe model, except with 5 additional solid state circuits plus valuable Radio & TV Tube Checker).
- Check one box to indicate manner of payment
- I enclose full payment. Ship "Edu-Kit" post paid.
 - Ship "Edu-Kit" C.O.D. I will pay postage.
 - Send me FREE additional information describing "Edu-Kit."

Name

Address

PROGRESSIVE "EDU-KITS" INC.

1186 Broadway, Dept. 550NN, Hewlett, N. Y. 11557

FROM OUR MAIL BAG

J. Statistis, of 25 Poplar Pl., Waterbury, Conn., writes: "I have repaired several sets for my friends, and made money. The "Edu-Kit" paid for itself. I was ready to spend \$240 for a Course, but I found your ad and sent for your Kit."

Ben Valerio, P. O. Box 21, Magna, Utah: "The Edu-Kits are wonderful. Here I am sending you the questions and also the answers for them. I have been in Radio for the last seven years, but like to work with Radio Signal Tracer, and build Radio Testing Equipment. I enjoyed every minute I worked with the different kits; the Signal Tracer works fine. Also like to let you know that I feel proud of becoming a member of your Radio-TV Club."

Robert L. Shuff, 1534 Monroe Ave., Huntington, W. Va.: "Thought I would drop you a few lines to say that I received my Edu-Kit, and was really amazed that such a bargain can be had at such a low price. I have already started repairing radios and phonographs. My friends were really surprised to see me get into the swing of it so quickly. The Trouble-shooting Tester that comes with the Kit is really swell, and I hope, if trouble, if there is any, to be found."

PRINTED CIRCUITRY

At no increase in price, the "Edu-Kit" now includes Printed Circuitry. You build a Printed Circuit Signal Injector, a unique servicing instrument that can detect many Radio and TV troubles. This revolutionary new technique of radio construction is now becoming popular in commercial radio and TV sets.

A Printed Circuit is a special insulated chassis on which has been deposited a conducting material which takes the place of wiring. The various parts are merely plugged in and soldered to terminals.

Printed Circuitry is the basis of modern Automation Electronics. A knowledge of this subject is a necessity today for anyone interested in Electronics.
